**The Oxford Handbook of Computational Linguistics** Ruslan Mitkov,2022-05-23 Ruslan Mitkov s highly successful Oxford Handbook of Computational Linguistics has been substantially revised and expanded in

this second edition Alongside updated accounts of the topics covered in the first edition it includes 17 new chapters on subjects such as semantic role labelling text to speech synthesis translation technology opinion mining and sentiment analysis and the application of Natural Language Processing in educational and biomedical contexts among many others The volume is divided into four parts that examine respectively the linguistic fundamentals of computational linguistics the methods and resources used such as statistical modelling machine learning and corpus annotation key language processing tasks including text segmentation anaphora resolution and speech recognition and the major applications of Natural Language Processing from machine translation to author profiling The book will be an essential reference for researchers and students in computational linguistics and Natural Language Processing as well as those working in related industries

**Enterprise Architecture at Work** Marc Lankhorst, 2017-03-10 Lankhorst and his co authors present ArchiMate 3.0 enterprise modelling language that captures the complexity of architectural domains and their relations and allows the construction of integrated enterprise architecture models They provide architects with concrete instruments that improve their architectural practice As this is not enough they additionally present techniques and heuristics for communicating with all relevant stakeholders about these architectures Since an architecture model is useful not only for providing insight into the current or future situation but can also be used to evaluate the transition from as is to to be the authors also describe analysis methods for assessing both the qualitative impact of changes to an architecture and the quantitative aspects of architectures such as performance and cost issues The modelling language presented has been proven in practice in many real life case studies and has been adopted by The Open Group as an international standard So this book is an ideal companion for enterprise IT or business architects in industry as well as for computer or management science students studying the field of enterprise architecture This fourth edition of the book has been completely reworked to be compatible with ArchiMate 3.0 and it includes a new chapter relating this new version to other standards New sections on capability analysis risk analysis and business architecture in general have also been introduced

**Search User Interfaces** Marti A. Hearst, 2009-09-21 The truly world wide reach of the Web has brought with it a new realisation of the enormous importance of usability and user interface design In the last ten years much has become understood about what works in search interfaces from a usability perspective and what does not Researchers and practitioners have developed a wide range of innovative interface ideas but only the most broadly acceptable make their way into major web search engines This book summarizes these developments presenting the state of the art of search interface design both in academic research and in deployment in commercial systems Many books describe the algorithms behind search engines and information retrieval systems but the unique focus of this book is specifically on the user interface It will be welcomed by industry professionals who design systems that use search interfaces as well as graduate students and academic researchers who investigate information systems

Joint FAO-IOC-IAEA technical guidance for the implementation of early warning systems for harmful

algal blooms Food and Agriculture Organization of the United Nations, United Nations Educational, Scientific and Cultural Organization-IOC, International Atomic Energy Agency, 2023-03-16 Globally there are 3 400 to 4 000 described species of marine microalgae but only 1 to 2 percent are considered to be harmful Harmful algal blooms HABs have significant impacts on food safety and security through contamination or mass mortalities of aquatic organisms The impacts and mass mortalities of marine species caused by harmful algae are not new and have been recorded for decades However there is growing concern that these events will increase due to accelerating global warming climate change and anthropogenic activities Indeed if not properly controlled aquatic products contaminated with HAB biotoxins are responsible for potentially deadly foodborne diseases and when rapidly growing HAB consequences include reduced dissolved oxygen in the ocean dead zones and mass mortalities of aquatic organisms Improving HAB forecasting is an opportunity to develop early warning systems for HAB events such as food contamination mass mortalities or foodborne diseases Surveillance systems have been developed to monitor HABs in many countries however the lead time or the type of data i e identification at the species level determination of toxicity may not be sufficient to take effective action for food safety management measures or other reasons such as transfer of aquaculture products to other areas Having early warning systems could help mitigate the impact of HABs and reduce the occurrence of HAB events The Joint FAO IOC IAEA technical guidance for the implementation of early warning systems EWS for HABs will guide competent authorities and relevant institutions involved in consumer protection or environmental monitoring to implement early warning systems for HABs present in their areas marine and brackish waters specifically those affecting food safety or food security benthic HABs fish killing HABs pelagic toxic HABs and cyanobacteria HABs The guidance provides a roadmap for stakeholders on how to improve or implement an EWS for HABs and biotoxins where appropriate It is important to note that not all countries and institutions can implement the same level of EWS for HABs and this guidance is intended mainly for those who seek to broaden existing early warning systems or who are just beginning to consider putting a system in place

**Visualization in Modern Cartography** A.M. MacEachren, D.R. Fraser Taylor, 2013-10-22 Visualization in Modern Cartography explores links between the centuries old discipline of cartography and today's revolutionary developments in scientific visualization The book has three main goals 1 to pass on design and symbolization expertise to the scientific visualization community information that comes from centuries of pre computer visualization by cartographers and their more recent experiences with computerizing the discipline 2 to help cartographers cope with the dramatic shift from print cartography to a dynamic virtual cartography for which their role is changing from that of map designer to one of spatial information display and or interface designer 3 to illustrate the expanded role for cartography in geographic environmental planning and earth science applications that comes with the development of interactive geographic visualization tools To achieve these goals the book is divided into three parts The first sets the historical cognitive and technological context for geographic cartographic visualization tool development The second covers

key technological symbolization and user interface issues The third provides a detailed look at selected prototype geographic cartographic visualization tools and their applications
