Exploring Emotions, Aesthetics and Wellbeing in Science Education Research Alberto Bellocchi,Cassie Quigley,Kathrin Otrell-Cass,2016-10-19 This book addresses new research directions focusing on the emotional and aesthetic nature of teaching and learning science informing more general insights about wellbeing It considers methodological traditions including those informed by philosophy sociology psychology and education and how they contribute to our understanding of science education In this collection the authors provide accounts of the underlying ontological epistemological methodological perspectives and theoretical assumptions that inform their work and that of others Each chapter provides a perspective on the study of emotion aesthetics or wellbeing using empirical examples or a discussion of existing literature to unpack the theoretical and philosophical traditions inherent in those works This volume offers a diverse range of approaches for anyone interested in researching emotions aesthetics or wellbeing It is ideal for research students who are confronted with a cosmos of research perspectives but also for established researchers in

various disciplines with an interest in researching emotions affect aesthetics or wellbeing *Aesthetics, Affect, and Making Meaning in Science Education* Per-Olof Wickman, Vaughan Prain, Russell Tytler, 2025-02-12 This book offers novel approaches theoretical insights and results on the development of students and teachers interest in science as situated learning It argues for the importance of the affective and emotional dimensions of teaching and learning in STEM classrooms in parallel to the cognitive dimensions Contributions to this book examine aesthetics aesthetic judgement and aesthetic experience in science education from the perspectives of researchers and practitioners and make a case for integrating aesthetics and affective experiences in science education teaching and learning research and practice They explore how an aesthetics of science can empirically be observed to take shape through classroom interactions and how such interactions influence learning and how science is valued in aesthetic terms in relation to other practices The research studies featured in this book span from preschool to undergraduate students and also include a theoretical contribution reviewing and synthesising the methodological contributions to this volume They draw on recent theoretical methodological and empirical advances on the role of aesthetic experience for learning science These new developments are used to investigate how a disciplinary aesthetics of science can be developed and can meet that of other subjects and how these various aesthetic practices may be generatively dovetailed for the benefit of learning science and developing an interest in science This book s contribution extends beyond the fields of science education research Its insights can assist policymakers instructional designers and teacher educators in considering emotional aspects of learning and values more generally when implementing strategies to foster meaning making alongside sense making It was originally published as a special issue of the International Journal of Science Education *Theory of Mind in Middle Childhood and Adolescence* Rory T. Devine, Serena Lecce, 2021-05-26 This landmark text integrates diverse perspectives on how humans understand others minds or theory of mind beyond early childhood into middle childhood and adolescence It explores how the neural cognitive and social changes of middle childhood and adolescence shape the ongoing development of theory of mind and how theory of mind helps children navigate their lives Drawing on cutting edge research from leading international experts this book provides a survey and analysis of the current state and future direction of the field It is organized around three themes relating to the key issues in contemporary research The first part focuses on the biological and cognitive bases of theory of mind in middle childhood and adolescence The second part goes on to explore the social predictors and consequences considering how theory of mind is shaped by social experiences and in turn impacts children s social lives in middle childhood and adolescence Finally the third part focuses on theory of mind in the context of neurodiversity disability and youth mental health in middle childhood and adolescence Offering in depth understanding for all students and scholars of developmental and cognitive psychology neuroscience clinical psychology and psychiatry and education this valuable text also identifies an agenda for future scholarship on this exciting topic *Psychological Register* ,1929 **Reason and Less** Vinod Goel, 2022-02-08 A new biologically driven model

of human behavior in which reason is tethered to the evolutionarily older autonomic instinctive and associative systems In Reason and Less Vinod Goel explains the workings of the tethered mind Reason does not float on top of our biology but is tethered to evolutionarily older autonomic instinctive and associative systems After describing the conceptual and neuroanatomical basis of each system Goel shows how they interact to generate a blended response Goel's commonsense account drives human behavior back into the biology where it belongs and provides a richer set of tools for understanding how we pursue food sex and politics Goel takes the reader on a journey through psychology cognitive behavioral developmental and evolutionary neuroscience philosophy ethology economics and political science to explain the workings of the tethered mind One key insight that holds everything together is that feelings generated in old widely conserved brain stem structures are evolution's solution to initiating and selecting all behaviors and provide the common currency for the different systems to interact Reason is as much about feelings as are lust and the taste of chocolate cake All systems contribute to behavior and the overall control structure is one that maximizes pleasure and minimizes displeasure Tethered rationality has some sobering and challenging implications for such real world human behaviors as climate change denial Trumpism racism or sexism They cannot be changed simply by targeting beliefs but will require more drastic measures the nature of which depends on the specific behavior in question Having an accurate model of human behavior is the crucial first step

[Ignite](#) Neeltje van Horen, 2025-03-13 A tour de force Drawing on cognitive psychology neuroscience and her own experience this book offers compelling lessons for how busy people can lead better lives Richard Layard What if the key to a happier more balanced life was already inside your head As a professor of financial economics Neeltje van Horen excelled in a demanding career but constant self doubt and stress left her feeling stuck Seeking a way out she turned to neuroscience and psychology and discovered how retraining her brain one small habit at a time transformed her life In Ignite van Horen shares her journey and her discoveries Blending relatable stories cutting edge research and practical strategies she reveals how small intentional changes can deliver meaningful results Recognising that everyone's path is unique she offers a range of techniques helping you discover what aligns best with your needs and aspirations Whether you're looking to boost mental performance break free from negative thought patterns or restore balance in your life Ignite gives you the tools to unlock your brain's potential and change your life

Misconceptions in Science Education Ilana Ronen, 2018-07-27 How do we make sense of our world How does giving an immediate intuitive response impact its quality what are its features and how is this related to misconceptions Who is afraid of misconceptions Despite cognitive ability and information being accessible like never before learners often provide incorrect intuition based responses to science and mathematics questions Based on comprehensive research combining quantitative and qualitative methodologies this book suggests a paradigm shift into an empathic space in which students elementary and middle school pre service teachers and researchers can utilize misconceptions as a learning tool The book follows the cathartic Aha moment in which the learner understands the source of

his incorrect response as the researcher re discovers the chief role of the facilitator teacher within the process of creating knowledge is based upon empathic human interaction The Psychological Register Carl Murchison,1929
