**The Conquer Bulimia Success Program , Parapsychology** Caroline Watt,2017-07-05 Many people believe that they have experienced paranormal

phenomena and others claim to possess psychic abilities For the past hundred years or so researchers have undertaken systematic and scientific work into these alleged experiences and abilities This collection of articles provides readers with a general sense of the methods used in this research the findings that have been obtained and the controversies generated by this work They cover a wide range of issues including the psychology of paranormal belief investigations into ghosts and hauntings laboratory research into extra sensory perception and psychokinesis and controlled tests of psychics and mediums An introductory essay sets each of the selected papers in context and provides additional references for those wishing to delve deeper into the issues surrounding each of the areas covered

**Questioning Causality** Rom Harré,Fathali M. Moghaddam,2016-01-25 Covering a topic applicable to fields ranging from education to health care to psychology this book provides a broad critical analysis of the assumptions that researchers and practitioners have about causation and explains how readers can improve their thinking about causation In virtually every laboratory research center or classroom focused on the social or physical sciences today the concept of causation is a core issue to be questioned tested and determined Even debates in unrelated areas such as biology law and philosophy often focus on causality What made that happen In this book experts from across disciplines adopt a reader friendly approach to reconsider this age old question in a modern light defining different kinds of causation and examining how causes and consequences are framed and approached in a particular field Each chapter uses applied examples to illustrate key points in an accessible manner The contributors to this work supply a coherent critical analysis of the assumptions researchers and practitioners hold about causation and explain how such thinking about causation can be improved Collectively the coverage is broad providing readers with a fuller picture of research in social contexts Beyond providing insightful description and thought provoking questioning of causation in different research areas the book applies analysis of data in order to point the way to smarter more efficient practices

Consequently both practitioners and researchers will benefit from this book

**Methods and Techniques of Research Revised Ed. , Basic Research in Parapsychology, 2d ed.** K. Ramakrishna Rao, 2016-03-15 This expanded and revised text includes thirteen experimental reports five new to this edition and seven review articles involving meta analysis and the assessment of evidence in specific areas of psi research The author provides a representative sample of the extensive literature in the controversial field of parapsychology and presents a few basic experiments illustrating various procedures and broadly reflecting the major trends of psi research Possible experimental procedures cumulative evidence showing the replicability of individual experiments and promising areas of psi research are also discussed Instructors considering this book for use in a course may request an examination copy here *Teaching and Learning Language: Current Trends and Practices (Penerbit USM)* Ambigapathy Pandian, Sunny Tan Siew Bek, Shaik Abdul Malik Mohamed Ismail, 2014-11-25 This book represents a collection of papers that relate to the challenges and problems posed by the ever changing and diversified nature of today s classroom The papers discuss and demonstrate methodologies and learning strategies and in the process recommend effective practices that are practical and open to adaptation for different teaching and learning contexts They range from suggestions on how to exploit information technology resources to individual or specific case studies These case studies report on a variety of contextual issues and problems that are specified to particular learning contexts This book therefore thus not only offers examples of tried and tested teaching strategies but also offers useful insights into specific sociocultural problems that are experienced by learners as well as teachers and interested stakeholders in particular settings and countries The papers offer a comprehensive documentation of past as well as present problems faced by teachers policy makers and students and discuss ways and strategies of overcoming such problems such that the teaching and learning process is not only enhanced but made more meaningful and fulfilling to both teachers and learners The inherently global perspective of the papers in this book makes it an enriching compendium
