Rozhdestvenskiy, 2019-11-30 This book highlights recent findings in industrial manufacturing and mechanical engineering and provides an overview of the state of the art in these fields mainly in Russia and Eastern Europe A broad range of topics and issues in modern engineering are discussed including the dynamics of machines and working processes friction wear and lubrication in machines surface transport and technological machines manufacturing engineering of industrial facilities materials engineering metallurgy control systems and their industrial applications industrial mechatronics automation and robotics The book gathers selected papers presented at the 5th International Conference on Industrial Engineering ICIE held in Sochi Russia in March 2019 The authors are experts in various fields of engineering and all papers have been carefully reviewed Given its scope the book will be of interest to a wide readership including mechanical and production engineers lecturers in engineering disciplines and engineering graduates *A Practitioner's Guide to European Patent Law* Paul England, 2025-08-21 This new edition offers a comprehensive and practical guide to European patent law This book uniquely addresses European patent law using a thematic approach assessing the national and EPO approaches together rather than in nation by nation chapters Each chapter therefore enables the common ground and differences between approaches to be assessed The most influential European patent law jurisdictions are covered in the book including the leading cases from the European Patent Office England and Wales France Germany and the Netherlands The book also draws insights from further afield with contributions from other very active patent jurisdictions including Italy Sweden Denmark and Switzerland In addition to featuring completely revised content on the fast moving subject areas of FRAND and plausibility and updates in all other areas of patent law the third edition includes for the first time fully integrated coverage of every substantive decision of the Unified Patent Court A must read for anyone working in the field of European patent law **The Online Journalism Handbook** Paul Bradshaw, 2017-08-31 The Online Journalism Handbook has established itself globally as the leading guide to the fast moving world of digital journalism showcasing the multiple possibilities for researching writing and storytelling offered to journalists through new technologies In this new edition Paul Bradshaw presents an engaging mix of technological expertise with real world practical guidance to illustrate how those training and working as journalists can improve the development presentation and global reach of their story through web based technologies The new edition is thoroughly revised and updated featuring a new chapter on social media and community management a fully updated chapter on online media law an increased focus on techniques for finding and verifying information online an expansion of the section on analytics a completely revised chapter on data journalism new chapters dedicated to liveblogging and mobile journalism and writing for social media platforms The Online Journalism Handbook Second edition is a guide for all journalism students and professional journalists as well as of key interest to digital media practitioners **Handbook of Industrial Polyethylene and Technology** Mark A. Spalding, Ananda Chatterjee, 2017-10-12 This handbook provides an

exhaustive description of polyethylene The 50 chapters are written by some of the most experienced and prominent authors in the field providing a truly unique view of polyethylene The book starts with a historical discussion on how low density polyethylene was discovered and how it provided unique opportunities in the early days New catalysts are presented and show how they created an expansion in available products including linear low density polyethylene high density polyethylene copolymers and polyethylene produced from metallocene catalysts With these different catalysts systems a wide range of structures are possible with an equally wide range of physical properties Numerous types of additives are presented that include additives for the protection of the resin from the environment and processing fillers processing aids anti fogging agents pigments and flame retardants Common processing methods including extrusion blown film cast film injection molding and thermoforming are presented along with some of the more specialized processing techniques such as rotational molding fiber processing pipe extrusion reactive extrusion wire and cable and foaming processes The business of polyethylene including markets world capacity and future prospects are detailed This handbook provides the most current and complete technology assessments and business practices for polyethylene resins

***CAD/CAM, Robotics and Factories of the Future*** Dipak Kumar Mandal, Chanan Singh Syan, 2016-01-05 This volume is based on the proceedings of the 28th International Conference on CAD CAM Robotics and Factories of the Future This book specially focuses on the positive changes made in the field of robotics CAD CAM and future outlook for emerging manufacturing units Some of the important topics discussed in the conference are product development and sustainability modeling and simulation automation robotics and handling systems supply chain management and logistics advanced manufacturing processes human aspects in engineering activities emerging scenarios in engineering education and training The contents of this set of proceedings will prove useful to both researchers and practitioners

***The Turing Guide*** Jack Copeland, Jonathan Bowen, Mark Sprevak, Robin Wilson, 2017-02-16 Alan Turing has long proved a subject of fascination but following the centenary of his birth in 2012 the code breaker computer pioneer mathematician and much more has become even more celebrated with much media coverage and several meetings conferences and books raising public awareness of Turing's life and work This volume will bring together contributions from some of the leading experts on Alan Turing to create a comprehensive guide to Turing that will serve as a useful resource for researchers in the area as well as the increasingly interested general reader The book will cover aspects of Turing's life and the wide range of his intellectual activities including mathematics code breaking computer science logic artificial intelligence and mathematical biology as well as his subsequent influence

***Handbook of Materials for String Musical Instruments*** Voichita Bucur, 2016-08-29 This book addresses core questions about the role of materials in general and of wood in particular in the construction of string instruments used in the modern symphony orchestra violins violas cellos and basses Further attention is given to materials for classical guitars harps harpsichords and pianos While some of the approaches discussed are traditional most of them depend upon new

scientific approaches to the study of the structure of materials such as for example wood cell structure which is visible only using modern high resolution microscopic techniques Many examples of modern and classical instruments are examined together with the relevance of classical techniques for the treatment of wood Composite materials especially designed for soundboards could be a good substitute for some traditional wood species The body and soundboard of the instrument are of major importance for their acoustical properties but the study also examines traditional and new wood species used for items such as bows the instrument neck string pegs etc Wood species properties for musical instruments and growth origins of woods used by great makers such as Antonio Stradivari are examined and compared with more recently grown woods available to current makers The role of varnish in the appearance and acoustics of the final instrument is also discussed since it has often been proposed as a secret ingredient used by great makers Aspects related to strings are commented As well as discussing these subjects with many illustrations from classical and contemporary instruments the book gives attention to conservation and restoration of old instruments and the physical results of these techniques There is also discussion of the current value of old instruments both for modern performances and as works of art having great monetary value The book will be of interest and value to researchers advanced students music historians and contemporary string instrument makers Musicians in general particularly those playing string instruments will also find its revelations fascinating It will also attract the attention of those using wood for a variety of other purposes for its use in musical instruments uncovers many of its fundamental features Professor Neville H Fletcher Australian National University Canberra
