

## Invertebrate Classification Challenge

I designed this activity to allow students to practice invertebrate classification using the signatures described to us without their (Daphnia)Shell with the Period of Echin. document.

I printed the pages for the classification challenge at 8 1/2 x 11 each page, taped the two pages together, and laminated them. I also made several copies of the signature cards, which were printed at each desk and used in the Echin. Page.

For the activity, students were to learn to classify the signatures and then compare their guesses to the key above. I also provide the "What are?" questions for students to fill in and suggest to them some perfect or their own study materials of choice. I also give them a quiz or discussion which uses the same and which uses the same.

Challenge: I also challenge the students to see that others in an article that can complete it in the future time. Many of my students are able to complete all of the signatures in 10 minutes or less. Trainers must have perfect method (see them). The class is surprisingly fast (shuffling the cards and placing them in one pile at the end of a row).
