Alexander, 2008 Investigating Science and Technology 8, 2010 **Investigating Science and Technology [8]**, 2008 **Investigating Science and Technology 8**, 2010 **Investigating Science and Technology Eight** Lionel Sandner, Nora Alexander, **Investigating Science and Technology Eight** Lionel Sandner, Nora Alexander, **Investigating Science and Technology** Lionel Sandner, 2009 **Investigating Science and Technology 8**, 2010 **Investigating Science and Technology** Lionel Sandner, 2008 *Investigating Science and Technology* Lionel Sandner, 2009 Investigating Science and Technology Lionel Sandner, 2008 *Investigating Science Communication in the Information Age* Richard Holliman, 2009 Sections include Engaging with public engagement Researching public engagement Studying science in popular media Mediating science news Communicating science in popular media and Examining audiences for popular science Introduction to Criminology Pamela J. Schram, Joseph A. Schwartz, Stephen G. Tibbetts, 2023-10-24 If you are considering a career in any aspect of criminal justice and you want to know more about the motivations and socio psychological makeup of serious offenders then this book is for you Introduction to Criminology Why Do They Do It applies the dominant theories in the existing criminological literature as to why people commit crimes In addition we examine many recent as well as many hypothetical examples of serious crimes and we demonstrate applications of theory as to why the offenders did what they did While other textbooks do a decent job in discussing the basic theories as well as exploring the various types of crime our book integrates various street crimes within each chapter and applies theories that are appropriate in explaining such criminal activity This is extremely important because most instructors never get to the latter typology chapters in a given semester or term So our approach is to incorporate them into the theoretical chapters in which they apply directly to the theories presented Our specific examples and true stories such as notable serial killings and other recent crimes in each chapter as well as our use of established theoretical models to explain the offenses is another primary distinction of this book Obviously this book is meant to be central to an introductory course in criminology but due to the emphasis on applied theoretical explanations it is also appropriate for higher level undergraduate and graduate courses in criminological theory or as a reference for anyone in the field of criminal justice In it we have integrated true crimes and some hypothetical examples both on a general level such as in the Applying Crime to Theory sections and more specifically in the Why Do They Do It sections which often involve serial killings mass murderers or other notorious examples of offenders offending The subtitle of our book Why Do They Do It relates to our theme Our goal in writing this book was to apply established theories of crime which are often seen as abstract and hypothetical to real crimes that have occurred as well as to hypothetical ones that are quite likely to occur To this end we explore the various reasons for

offending or the why they do it in various cases from the first documented serial killers in the United States the Harpe Brothers in the late 18th century to California cop killer spree killer Christopher Dorner in 2013 and then Payton S Gendron who massacred 10 Black shoppers at a grocery store in Buffalo New York in 2022 Importantly throughout these discussions of actual crimes we will apply theories As you will see some of the theories that applied to the earliest crimes seem to apply to the most modern crimes as well Unlike other authors in this field we chose not to include separate chapters on violent or property crimes because we have worked those into and applied them to the theories explored in each chapter We strongly believe that by integrating discussions of such serious crimes all crimes previously identified by the FBI as Index or Part I offenses including murder rape robbery aggravated assault burglary motor vehicle theft larceny and arson as well as other crimes such as simple assault and driving under the influence into the theoretical chapters provides the best exploration of why people commit such offenses And the flip side is good as well by discussing offenses together with theories we show you how to apply theories toward explaining other instances of criminal behavior Again this goes back to our theme of why do they do it It demonstrates our goal Apply the appropriate theories for the specific crime

Measurement and Modeling of Polychlorinated Biphenyl Availability from Contaminated Sediment and Evaluation of Ecosystem Recovery Elisabeth Marie-Louise Janssen, 2010 This research comprises measurement and modeling of polychlorinated biphenyl PCB bioaccumulation from contaminated sediments and the evaluation of an in situ sorbent amendment with activated carbon AC to allow ecosystem recovery Laboratory bioassays with the deposit feeding polychaete *Neanthes arenaceodentata* showed that PCB uptake from the aqueous phase accounted for less than three percent of the total uptake High sediment ingestion rates and fast bioaccumulation of PCBs exceeding sediment concentration within 14 days of exposure suggest that deposit feeders are promising test organisms to evaluate local sediment conditions A biodynamic model that described bioaccumulation by a mass balance approach of contaminant influx and efflux was parameterized for this polychaete The model allows the prediction of tissue concentrations and facilitates the understanding of exposure pathways Subsequently the effects of an AC amendment to sediment from a PCB contaminated site at Hunters Point within the San Francisco Bay California were evaluated by employing caged deposit feeders along with polyoxymethylene POM samplers using parallel in situ and ex situ bioassays with homogenized untreated or AC amended sediment The AC amendment reduced bioaccumulation by 90% in the laboratory and by 44% in parallel field tests with treated and untreated sediment In situ measurements with passive pore water samplers showed that PCB uptake was greater for samplers placed in the surface sediment compared to the underlying AC amendment The tests revealed three factors that influenced the in situ bioassays 1 AC amendment significantly reduces bioavailability under laboratory and field conditions 2 Deposit feeding organisms exhibit less PCB uptake from untreated sediment when feeding is reduced and 3 Sediment deposition within test cages in the field partially masks the benefit of underlying AC amended sediment and emphasizes the need of area wide considerations when

assessing contaminated sediment management and remediation strategies Parallel ex situ and in situ bioassays in combination with passive sampler measurements can tease apart field influences on PCB exposure These tests should accompany each other to evaluate in situ exposure and the effectiveness of remediation alternatives This research further focused on pollution induced changes of the benthic community at Hunters Point and the evaluation of the expected recovery potential after an AC amendment for in situ sediment remediation The benthic community composition was compared for the PCB contaminated site at Hunters Point and 30 reference sites in the San Francisco Bay to evaluate pollution induced changes Given the similar number of species total abundance and diversity indices between the reference sites and Hunters Point it could be concluded that the benthic communities did not differ greatly However further analysis based on functional traits of the benthic community shows that the community at Hunters Point is deprived of species that may be stressed by the contaminated sediment due to their feeding mode reproductive mode or position in the sediment The benthic community in comparison to reference sites lacks deposit feeders subsurface carnivores egg laying species and species with no weak protective barrier Sediment chemistry analysis shows that PCBs are the major risk drivers at Hunters Point and that the reference sites show only ambient levels of PCB contamination Biodynamic modeling demonstrates how varying exposure and functional feeding strategies affect PCB bioaccumulation with a deposit feeder accumulating two orders of magnitude more PCBs in its lipids than a facultative deposit feeder and up to three orders of magnitude more than a filter feeder Modeling scenarios also show that PCB tissue concentrations at Hunters Point are two orders of magnitude higher than at the reference sites Sediment remediation with a sorbent activated carbon amendment at Hunters Point can reduce PCB availability by 85 to 90% under favorable field and treatment conditions The expected remedial success corresponds to exposure conditions within sediment quality guidelines and the cleanup goal but remains slightly higher than at the reference sites

Sustainable Practices in the Fashion and Retail Industry Tarnanidis, Theodore, Papachristou, Evridiki, Karypidis, Michail, Manda, Vijaya Kittu, 2025-03-07 Sustainable shopping practices are becoming more prevalent in the fashion and retail industry as consumers demand more ethical and environmentally friendly products The industry's negative environmental and social impacts are being reduced through these efforts which often create high levels of waste pollution and exploitation Technological advancements shifting values and changing economic and environmental conditions are shaping the future of consumer shopping habits As the impact of consumers on society and the environment grows and digital innovations alter the way people interact with brands the retail landscape is expected to change significantly Further exploration of these sustainable practices may provide improved solutions for environmentally conscious fashion and retail businesses Sustainable Practices in the Fashion and Retail Industry explores the continuing trends of sustainable techniques and practices in the fashion and retail business It examines how consumer habits are evolving toward more thoughtful personalized and technology driven experiences that align with modern values and lifestyles This book covers topics such as

green marketing social media and circular economy and is a useful resource for business owners policymakers entrepreneurs economists academicians and researchers The Digitally-Agile Researcher Natalia Kucirkova, Oliver Quinlan, 2017-11-30

What survival skills do academics need to become digitally agile and to establish an effective digital academic presence The twenty first century academic is an engaged researcher who connects builds and sustains varied and global audiences interested in their research In one handy book this essential read contains comprehensive advice on developing and sustaining a unique mix of twenty first century scholarly skills and digital competencies From getting started with Twitter to more detailed advice on how to manage time when performing the roles of an academic blogger and forum moderator this book provides real world case studies to illustrate how to integrate digital engagement with traditional scholarly work With a range of helpful strategies The Digitally Agile Researcher is a credible and practical guide for academics at all stages of their career doctoral students early career researchers or experienced academics The Digitally Agile Researcher is an important and welcome contribution to a growing literature on academic scholarship in the digital age The book should be read by faculty and administrators alike as it lays out a clear roadmap of the digital opportunities and challenges that researchers face and they support they require If there is any hope for the future of the contemporary university it will come through the communities we forge in new scholarly practices and the ways in which we negotiate digital society The Digitally Agile Researcher will be instrumental in fostering those communities Karen Gregory University of Edinburgh UK Optimizing Student Engagement in Online Learning Environments Kumar, A.V. Senthil, 2017-11-30 Digital classrooms have become a common addition to curriculums in higher education however such learning systems are only successful if students are properly motivated to learn Optimizing Student Engagement in Online Learning Environments is a critical scholarly resource that examines the importance of motivation in digital classrooms and outlines methods to reengage learners Featuring coverage on a broad range of topics such as motivational strategies learning assessment and student involvement this book is geared toward academicians researchers and students seeking current research on the importance of maintaining ambition among learners in digital classrooms **Disciplinary and Interdisciplinary Education in STEM** Yeping Li, Zheng Zeng, Naiqing Song, 2024-03-19 This book provides an international platform for educators from different STEM disciplines to present discuss connect and develop collaborations in two inter related ways 1 sharing and discussing changes and innovations in individual discipline based education in STEM STEAM and 2 sharing and discussing the development of interdisciplinary STEM STEAM education Possible relationships and connections between individual disciplines like mathematics or physics and STEM education remain under explored and the integration of traditionally individual discipline based education in STEM education is far from balanced Efforts to pursue possible connections among traditionally separated individual disciplines in STEM are not only necessary for the importance of deepening and expanding interdisciplinary research and education in STEM but also for the ever increasing need of reflecting on and changing how

traditional school subjects like mathematics or physics can and should be viewed taught and learned Scholars from eight countries regions provide diverse perspectives and approaches on changes and innovations in STEM disciplinary and interdisciplinary education Disciplinary and Interdisciplinary Education in STEM will be a great resource to students and researchers in STEM education as well as STEM curriculum developers and teacher educators internationally
