Frisbie,2018-09-23 INTRODUCTIONI have written this book for entry to expert level IMCA Sportmod racer Most of the initial information provided is just a guide and derived from talking with chassis builders successful racers conducting years of research attending various chassis schools and our own trial and error at the track Not all racers will agree with everything in this guide but we believe in it and reading and applying the information will help you to maximize your racing results This book will teach you how setup changes on an IMCA Sportmod will affect the cars handling on the track There is no one change that will make every car fast but understanding how each change affects a cars handling is the first step in getting faster and making it to victory lane The key to being successful on the race track is getting your setup as close as possible in the shop adjusting your cars handling to the current track conditions and then adjusting your driving style to maximize traction through all areas of the race track The driver job is to maximize the limited traction a dirt car has on the dynamic changing race track conditions **XXX-MAIN** Martin Crisp,2002 **Quarter Midget Chassis Technology** Steve Smith,2004-01-01 A complete chassis tuning and setup guide for the quarter midget race car Addresses race car handling basics suspension systems chassis setup and alignment track tuning and adjustment Includes a complete guide to understanding and adjusting handling problems **Stock Car Setup Secrets HP1401** Bob Bolles,2003-06-03 Learn everything you need to know about winning in this hands on guide which features the latest stock car racing chassis and suspension technology Subjects covered include roll centers chassis setup racing shocks aerodynamics springs steering systems rear geometry brakes testing procedures design priorities chassis dynamics bump steer weight transfer camber caster Ackermann racing software and instructions **Dirt Late Model Chassis Technology** Joe Garrison,Steve Smith,2004 A complete guide to setting up and adjusting the Dirt Late Model race car and 4 link suspension Includes chassis setup and alignment setups for all track conditions and adjustments for common handling problems *Carroll Smith's Engineer in Your Pocket* Carroll Smith,1998 Chassis & Suspension Engineering Geoffrey Howard,1987 *Motorcycle Chassis Design* Tony Foale,Vic Willoughby,1984 **Race Car Technology Full Course** Bob Bolles,2019-07 The Full Course

RCT book will help you avoid the trial and error approach to chassis setup It will teach you sound proven technology that is both easy to understand and easy to use so you can set up your race car in the shop and see the positive results on the track immediately with very little tweaking What follows is a common sense approach to chassis setup vehicle dynamics and race car design founded on solid engineering theory However you will need to have an open mind and be willing to accept new ideas that may go against previous chassis setup thinking Just to make it clear the technology presented here applies to all race cars from quarter midgets to Formula One and everything in between This book tends to lean towards stock car racing because it represents most of the world s automobile racing But know that not only will be useful for all forms of circle track racing from asphalt types to dirt cars a great deal of the technology applies to all race cars Sprint Car Chassis Set-Up Steve Smith,1990 Go-kart Chassis's Design and Construction Based on Theoretical and Experimental Findings ,2002

Design and Fabrication of Go-kart Chassis Muhamad Aslam Kamarudin,2012 This thesis deals with the design and fabrication of go kart chassis The objective of this thesis is to design and fabricate a go kart chassis of an electric go kart The main problem is the cost for current go kart chassis is too expensive so the project is decide to fabricate with a lower cost The scopes identified chassis design should bear load of 150kg and the go kart chassis must with floor dimension of chassis is 1400mmx830mm There are many steps taken to design and fabricate this chassis The first stage is did some literature review about the existing go kart and go kart chassis Mostly current model of go kart chassis is made from tubular pipe Hence this project is to modify the current model of go kart chassis into a model that is easier to design build and modify Follow up with some designing and sketching During this phase three designs had been sketch to be as the design concepts The structural three dimensional solid modelling of go kart chassis was developed by using Solid Works engineering drawing software As for each design have their advantages and disadvantages After done with design and sketch conceptual process is done and design 3 has been chosen because this design is more advantageous than other two designs Design 3 is lightweight and easier to design build and modify Some modification is done on design 3 where the go kart chassis is more space saving and the design has provided protection to the users to prevent the user from fall during drive the go kart Next stage after finalize the design the project is continued with fabrication process The fabrication process also undergoes many steps such as material marking cutting drilling welding grinding and finalizing the go kart chassis by painting to make a go kart chassis more interested Thus by finishing this project the objective of the project is achieved Finally the conclusion about this project and the recommendations for the future plan also attached together with this thesis
