

## **Dissecting your lamprey:**

### **External Anatomy:**

Become familiar with the organism. Use these diagrams to become more aware of where things are and where to cut. Make a plan of what you hope to do, answer our questions, and use our guide to move through the organism.

Before you begin, be sure to evaluate where you want to cut. It might be a good idea to make marks on your cutting board of where you plan to make any cuts, especially cross section cuts.

What does the organism look like?

Are there any areas you want to make note of or places you'll need to remember in the future?

Where do you think it will be the most difficult to cut? Why?

What do you predict the organism will look like on the inside?
