Chapter 2

Job Order Costing and Analysis

QUESTIONS

1. Factory overhead is not identified with specific units (jobs) or batches (job lots). Therefore, to assign costs, estimates of the relation between factory overhead cost and job or job lot are necessary. Since managers need timely cost information, we need to estimate a predetermined overhead rate to use in applying estimated overhead to jobs. This estimated amount also helps job order companies determine prices on a timely basis.
2. Several other factors (allocation bases) are possible and reasonable. These common factors often include direct materials or machine hours.
3. The job order cost sheet captures information on cost and quantity of direct material and direct labor, and on the amount of factory overhead applied to the respective job or job lot. Management and employees use this information to monitor costs during production and to estimate total cost of production.
4. Each job is assigned a subsidiary ledger account. This account serves as the "posting account" (accumulates all increases and decreases) during production for direct material, direct labor, and applied factory overhead. The collection of job cost sheets for all of the jobs in process make up a subsidiary ledger controlled by the Work in Process Inventory account in the general ledger.

When a job is finished, its job cost sheet is completed and moved from the file of jobs in process to the file of finished jobs awaiting delivery to customers. This latter file

Managerial Accounting Ramji Balakrishnan,Konduru Sivaramakrishnan,Geoffrey B. Sprinkle,2008-11-10 Most managerial accounting texts emphasize the mechanics of managerial accounting While important mechanics are not enough To solve business problems students need to understand how managerial accounting can improve decision making and when and where a particular tool or technique is appropriate Balakrishnan s Managerial Accounting 1st edition presents accounting information in the context of business decision making It combines the traditional topics of

managerial accounting with a strategic framework that shows students how to construct decision models and measure information. By linking business decisions with accounting information, students will be motivated to learn and make more informed decisions. Balakrishnan will appeal to courses where there is a true focus on decision making and accounting is placed within a business context.

Accounting, Costing, and Management Riad Izhar, Janet Hontoir, 2001. An updated edition to cover the requirements of the 2000 A Level specifications. This book is also useful as an introduction to professional accounting courses. Numerous examples and exercises.

Management Accounting, 6e Will Seal, Carsten Rohde, Ray Garrison, Eric Noreen, 2018-10-30. Management Accounting 6e Managerial Accounting Irvin N. Gleim, Terry L. Campbell, 1988.

Industry 4.0 Solutions for Building Design and Construction Farzad Pour Rahimian, Jack Steven Goulding, Sepehr Abrishami, Saleh Seyedzadeh, Faris Elghaish, 2021-12-20. This book provides in depth results and case studies in innovation from actual work undertaken in collaboration with industry partners in Architecture Engineering and Construction. AEC Scientific advances and innovative technologies in the sector are key to shaping the changes emerging as a result of Industry 4.0. Mainstream Building Information Management (BIM) is seen as a vehicle for addressing issues such as industry fragmentation, value driven solutions, decision making, client engagement and design process flow. However, advanced simulation, computer vision, Internet of Things (IoT), blockchain, machine learning, deep learning and linked data all provide immense opportunities for dealing with these challenges and can provide evidenced based innovative solutions not seen before. These technologies are perceived as the true enablers of future practice but only recently has the AEC sector recognised terms such as golden key and golden thread as part of BIM processes and workflows. This book builds on the success of a number of initiatives and projects by the authors which include seminal findings from the literature, research and development and practice based solutions produced for industry. It presents these findings through real projects and case studies developed by the authors and reports on how these technologies made a real world impact. The chapters and cases in the book are developed around these overarching themes: BIM and AEC Design and Optimisation, Application of Artificial Intelligence in Design, BIM and XR as Advanced Visualisation and Simulation Tools, Design Informatics and Advancements in BIM, Authoring Green Building Assessment, Emerging Design Support Tools, Computer Vision and Image Processing for Expediting Project Management and Operations, Blockchain, Big Data and IoT for Facilitated Project Management, BIM Strategies and Leveraged Solutions. This book is a timely and relevant synthesis of a number of cogent subjects underpinning the paradigm shift needed for the AEC industry and is essential reading for all involved in the sector. It is particularly suited for use in Masters level programs in Architecture Engineering and Construction.

Strategic Corporate Finance Justin Pettit, 2011-07-12.
