Geomechanics and Geodynamics of Rock Masses Vladimir Litvinenko, 2018-05-15 Geomechanics and Geodynamics of Rock Masses contains contributions presented at EUROCK 2018 the 2018 International Symposium of the International Society for Rock Mechanics ISRM 2018 Saint Petersburg Russia 22-26 May 2018 Dedicated to recent advances and achievements in the fields of geomechanics and geotechnology the main topics of the book include Physical and mechanical properties of fractured rock laboratory testing and rock properties field measurements and site investigations Geophysics in rock mechanics Rock mass strength and failure Nonlinear problems in rock mechanics Effect of joint water on the behavior of rock foundation Numerical modeling and back analysis Mineral resources development methods and rock mechanics problems Rock mechanics and underground construction in mining hydropower industry and civil engineering Rock mechanics in petroleum engineering Geodynamics and monitoring of rock mass behavior Risks and hazards Geomechanics of technogenic deposits Geomechanics and Geodynamics of Rock Masses will be of interest to researchers and professionals involved in the various branches of rock mechanics and rock engineering EUROCK 2018 organized by the Saint Petersburg Mining University is a continuation of the successful series of ISRM symposia in Europe which began in 1992 in Chester UK

*Phenolic Antioxidants in Foods: Chemistry, Biochemistry and Analysis* Alam Zeb, 2021-09-27 Plant foods are an essential part of our daily diet and constitute one of the highest contributors to the world economy These foods are rich in phenolic compounds which play a significant role in maintaining our health This textbook presents a comprehensive overview of the

chemistry biochemistry and analysis of phenolic compounds present in a variety of foods The text can be used as a singular source of knowledge for plant food science and technology covering all of the important chemical biochemical and analytical aspects needed for a thorough understanding of phenolic antioxidants in foods Phenolic Antioxidants In Foods Chemistry Biochemistry and Analysis is comprised of three sections The first section covers the basic concepts of antioxidants their chemistry and their chemical composition in foods providing a detailed introduction to the concept The second section covers the biochemical aspects of phenolic antioxidants including their biosynthetic pathways biological effects and the molecular mechanism of antioxidant effects in the biological system This section promotes an understanding of the fundamental biochemical reactions that take place in foods and after digestion and absorption The third section covers the analytical chemistry used in the analysis of phenolic antioxidants in foods including the basic analytical procedures methods for analysis and chromatographic and spectroscopic analyses This section is significant for aspiring food chemists and manufacturers to evaluate the nature and chemistry of phenolic antioxidants in foods Featuring helpful quizzes section summaries and key chapter points this textbook is the perfect learning tool for advanced chemistry undergraduates and post graduates looking to gain a fundamental understanding of phenolic antioxidants in food products

**Responses of Marine Microbes to Multiple Environmental Drivers of Global Change: the Interplay of Abiotic and Biotic Factors**

Yuanyuan Feng, Shengwei Hou, Feixue Fu, Michael Yu Roleda, 2022-10-17

**Silymarin Puzzle** Peter Surai, Anton Surai, 2023-06-26 For the last 30 years polyphenols were in the centre of research work worldwide Silymarin an extract from a medicinal plant *Silybum marianum* also known as milk thistle has a special place in this group having been used in human medicine for the management of liver diseases since ancient times Accumulating scientific evidence indicates that silymarin is characterised by a wide range of protective pharmacological activities and this topic has received tremendous attention in recent years However until now there has been no single monograph addressing major questions related to silymarin chemistry biochemistry and practical applications The goal of this book is to provide up to date information about silymarin chemistry biochemistry and molecular mechanisms of protective actions of this phytochemical with a special emphasis to its vitagene and transcription factor modulating properties Silymarin applications in human diseases including hepatoprotection neuroprotection anti diabetic anti arthritis and other protective activities are reviewed Immunomodulating anti inflammatory anti toxic protective activities of silymarin are characterised in detail Practical applications of silymarin in poultry and animal industry with a special emphasis on its protective roles in gut health maintenance are also presented This book will be of practical importance to medical and pharmaceutical scientists including medical doctors pharmacists consultants etc as well as to poultry animal scientists poultry producers nutritionists and vets as well as to students of medical biological and agricultural backgrounds It can also be of interest for researchers in areas related to physiology biochemistry nutrition and veterinary medicine

**Methods and Applications in Neurodegeneration** Tingyuan Lang, Lei Zhou, Jingming Hou, Nicolas

Casadei ,Eduard Rodriguez-Farre,2024-09-20 This Research Topic is part of the Methods and Applications in Frontiers in Neuroscience series This series aims to highlight the latest experimental techniques and methods used to investigate fundamental questions in neuroscience research with a major focus on neurodegeneration Review articles or opinions on methodologies or applications including the advantages and limitations of each are welcome This Topic includes technologies and up to date methods which help advance science The contributions to this collection will undergo peer review Novelty may vary but the utility of a method or protocol must be evident We welcome contributions covering all aspects of Neurodegeneration including xenobiotic and bioagents induced neurotoxicity as a tool to study neurodegeneration and neuroprotection as well as neurotoxicity models of neurodegeneration Submissions will be handled by the team of Topic Editors

*Underutilised Crop Genomes* Mark A. Chapman,2022-11-03 This book highlights the uses for underutilized crops presenting the state of the art in terms of genome sequencing for over 30 crops previously understudied and under researched In a changing climate and with significant pressure on the land it is the ideal time to be discussing novel crops with significant biotic and abiotic tolerances and or rich nutrient profiles for consumers Previously the only species with sequenced genomes were high profile internationally recognized crops but in the current era genomes are being sequenced for dozens of crops including those previously classified as underutilized now being investigated This book covers food crops from fruits to tubers and from grasses to legumes as well as crops with non food applications Some of these crops have draft genomes and others have polished genomes with extensive resequencing panels Each chapter tells the story of an individual crop or crop group written by experts focusing on the genome data available revealing more about crop domestication and genetic variation and the current and future prospects given that this data is now becoming available It also highlights how even small sequencing projects can provide draft genome sequences suitable for gene discovery comparative genomics and identification of molecular markers for understanding these crops further

*Comprehensive Toxicology* ,2017-12-01  
*Comprehensive Toxicology* Third Edition Fifteen Volume Set discusses chemical effects on biological systems with a focus on understanding the mechanisms by which chemicals induce adverse health effects Organized by organ system this comprehensive reference work addresses the toxicological effects of chemicals on the immune system the hematopoietic system cardiovascular system respiratory system hepatic toxicology renal toxicology gastrointestinal toxicology reproductive and endocrine toxicology neuro and behavioral toxicology developmental toxicology and carcinogenesis also including critical sections that cover the general principles of toxicology cellular and molecular toxicology biotransformation and toxicology testing and evaluation Each section is examined in state of the art chapters written by domain experts providing key information to support the investigations of researchers across the medical veterinary food environment and chemical research industries and national and international regulatory agencies Thoroughly revised and expanded to 15 volumes that include the latest advances in research and uniquely organized by organ system for ease of reference and diagnosis this new

edition is an essential reference for researchers of toxicology Organized to cover both the fundamental principles of toxicology and unique aspects of major organ systems Thoroughly revised to include the latest advances in the toxicological effects of chemicals on the immune system Features additional coverage throughout and a new volume on toxicology of the hematopoietic system Presents in depth comprehensive coverage from an international author base of domain experts

*Environmental Toxicology and Endocrinology* Mr. Rohit Manglik,2024-03-06 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels Science of Ashwagandha: Preventive and Therapeutic Potentials Sunil C. Kaul,Renu Wadhwa,2017-09-13 Rapidly increasing aging population and environmental stressors are the two main global concerns of increasing incidence of a variety of pathologies in the modern society The complex etiologies and pathologies cause major challenges to disease treatment On the other hand several herbs are known for their health caring and disease curing activities Ashwagandha a popular herb in Indian traditional home medicine Ayurveda has gathered increasing recognition in recent years when the chemically synthesized drugs for single target therapies showed limited success and adverse toxic effects Ashwagandha is known as a powerful adaptogen and trusted to enhance function of the brain reproductive system cell mediated immunity and increase the body s defense against disease and possess anti inflammatory anticancer and anti arthritic activities In this book for the first time we provide a complete portrait on scientific understanding of the effects of Ashwagandha and its active principles for a variety of preventive and therapeutic activities

**Digital Transformation in Industry** Vikas Kumar,Jiewu Leng,Victoria Akberdina,Evgeny Kuzmin,2022-04-21 This book offers a selection of the best papers presented at the annual international scientific conference Digital Transformation in Industry Trends Management Strategies DTI2021 held by the Institute of Economics Ural Branch of the Russian Academy of Sciences in Ekaterinburg Russia on October 29 2021 The book focuses on the idea of introduction mechanisms for digitization processes and on highlighting successful digital transformation strategies in all sectors of industry Key topics include the development of a cyber physical production system for Industry 4 0 digital design technologies for enhancing the competitiveness of products and companies digital twin driven product manufacturing and services and the effects of the industrial digital transformation on society and the environment With regard to implementing IT and other technological innovations lessons learned in developed and developing economies as well as small and large enterprises are included Given its scope the book offers a valuable asset for researchers and managers of industrial organizations alike Geomechanics and Geodynamics of Rock Masses, Volume 1 Vladimir Litvinenko,2018-05-20 This book is Volume 1 of the EUROCK 2018 proceedings Geomechanics and Geodynamics of Rock Masses contains contributions presented at EUROCK 2018 the 2018 International Symposium of the International Society for Rock Mechanics ISRM 2018 Saint Petersburg Russia 22 26 May

2018 Dedicated to recent advances and achievements in the fields of geomechanics and geotechnology the main topics of the book include Physical and mechanical properties of fractured rock laboratory testing and rock properties field measurements and site investigations Geophysics in rock mechanics Rock mass strength and failure Nonlinear problems in rock mechanics Effect of joint water on the behavior of rock foundation Numerical modeling and back analysis Mineral resources development methods and rock mechanics problems Rock mechanics and underground construction in mining hydropower industry and civil engineering Rock mechanics in petroleum engineering Geodynamics and monitoring of rock mass behavior Risks and hazards Geomechanics of technogenic deposits Geomechanics and Geodynamics of Rock Masses will be of interest to researchers and professionals involved in the various branches of rock mechanics and rock engineering EUROCK 2018 organized by the Saint Petersburg Mining University is a continuation of the successful series of ISRM symposia in Europe which began in 1992 in Chester UK

*Human Insecurities in Southeast Asia* Paul J. Carnegie, Victor T. King, Zawawi Ibrahim, 2016-08-30 This book is a collection of work by scholars currently pursuing research on human security and insecurities in Southeast Asia It deals with a set of insecurities that is not readily understood or measurable As such it conceptually locates the threats and impediments to human security within relationships of risk uncertainty safety and trust At the same time it presents a wide variety of investigations and approaches from both localized and regional perspectives By focusing on the human and relational dimensions of insecurities in Southeast Asia it highlights the ways in which vulnerable and precarious circumstances human insecurities are part of daily life for large numbers of people in Southeast Asia and are mainly beyond their immediate control Many of the situations people experience in Southeast Asia represent the real outcomes of a range of largely unacknowledged socio cultural economic transformations interlinked by local national regional and global forces factors and interests Woven from experience and observations of life at various sites in Southeast Asia the contributions in this volume give an internal and critical perspective to a complex and manifold issue They draw attention to a variety of the less than obvious threats to human security and show how perplexing those threats can be All of which underscores the significance of multidisciplinary approaches in rethinking and responding to the complex array of conditioning factors and interests underlying human insecurities in Southeast Asia

*Climate Change and the Role of Education* Walter Leal Filho, Sarah L. Hemstock, 2019-11-28 This book offers insights into the educational dimensions of climate change and promotes measures to improve education in this context It is widely believed that education can play a key role in finding global solutions to many problems related to climate change Indeed education as a process not only helps young people to better understand and address the impact of global warming but also fosters better attitudes and behaviours to aid efforts towards mitigating climate change and adapting to a changing environment But despite the central importance of education in relation to climate change there is a paucity of publications on this theme Against this background the book focuses on the educational aspects of climate change and showcases examples of research projects and other initiatives

aimed at educating various audiences It also provides a platform for reflections on the role education can play in fostering awareness on a changing climate Presenting a wide range of valuable lessons learned which can be adapted and replicated elsewhere the book appeals to educators and practitioners alike

**Regulatory Toxicology in the European Union** Tim Marrs, Kevin Woodward, 2018-02-21 Consumer and environmental protection depend on the careful regulation of all classes of chemicals Toxicology is the key science used to evaluate safety and so underpins regulatory decisions on chemicals With the growing body of EU legislation involved in chemical regulation there is a concomitant need to understand the toxicological principles underlying safety assessments Regulatory Toxicology in the European Union is the first book to cover regulatory toxicology specifically in Europe It addresses the need for a wider understanding of the principles of regulatory toxicology and their application and presents the relationship between toxicology and legislative processes in regulating chemical commodities across Europe This title has a broad scope covering historical and current chemical regulation in Europe the role of European agencies and institutions and also the use of toxicology data for important classes of chemicals including human and veterinary medicines animal feed and food additives biocides pesticides and nanomaterials This book is therefore extremely pertinent and timely in the toxicology field at present This book is an essential reference for regulatory authorities industrialists academics undergraduates and postgraduates working within safety and hazards toxicology the biological sciences and the medicinal and pharmaceutical sciences across the European Union

**Vitagenes in avian biology and poultry health** Peter Surai, 2023-08-14 Commercial poultry production is associated with various types of stress leading to decrease of productive and reproductive performance and compromised health of growing chickens parent birds as well as commercial layers Stress adaptation is associated with various signaling pathways and is executed at the gene level The term vitagenes refers to a group of redox sensitive genes that are involved in stress sensing and preserving cellular adaptive homeostasis The vitagene family includes heat shock proteins superoxide dismutase glutathione and thioredoxin systems and sirtuins The vitagenes are key players in redox signaling and redox homeostasis maintenance in birds including poultry under commercial stress conditions of egg and meat production Development of the vitagene concept become an important milestone in understanding molecular mechanisms of adaptation to stress The goal of this book is to provide up to date information about the roles of vitagenes in avian biology and poultry health Special emphasis is put on the role of vitagenes as an essential part of the redox homeostasis maintenance stress adaptation and development of adaptive homeostasis The book provides data to indicate that nutritional modulation of vitagenes is a new direction in nutritional sciences Practical results of the successful usage of the vitagene concept in poultry production are also presented This book is intended to be of practical importance to avian animal scientists poultry producers to nutritionists and vets students of biological and agricultural colleges and universities It can also be interesting for researchers in areas related to physiology biochemistry nutrition ecology environmental sciences evolutionary biology etc

*Conceptualizing Plant-Based Nutrition* Ramesh S.

V.,Shelly Praveen,2022-10-10 This book deliberates on the various aspects of plant based nutrition Plant based nutrition has numerous potential health benefits as it is low on calories nevertheless high on nutrient density and satiety and also nutrient supplementation makes them wholesome diets Starting with the importance of biodiversity contributing to the nutrition the book discusses the development or utilization of nutrient dense crops foods with their bioavailability properties and health effects Further it deals with the enrichment of micronutrients through bio fortification fortification the role of food matrix and nutrient bioavailability including the role of plant based milk alternatives The linkage between food and health is also being discussed in the context of anti nutritional factors metabolic fate of the food and genomics Finally the implications of next gen biotech crops and food safety issues imperative to define the concept of safe nutrition are discussed With contributions from plant nutrition experts this book serves as a one stop reference for plant scientists food technologists and nutritionists looking to understand the concept of plant based nutrition and its linkage with human health
