

Psychological Manipulation

HOW TO DEAL WITH MANIPULATIVE PEOPLE:

Disengage.

Manipulators typically try to extract a particular emotional response from you, but you must not give in to their demands. For example, if a manipulative friend has a habit of flattering you before asking for an impossible favor, don't give in- reply politely and change the topic of conversation.

Be confident.

A devious thing manipulators often do is make another person doubt their intuition, abilities and reality. If you ever experience this, stick to your opinions. And if this happens regularly in your relationships, it's a sign that maybe you should leave.

Address the situation.

Call them out for their manipulative behaviors at the time it is happening. When you speak about it, focus on how their behavior is affecting you rather than using accusatory remarks, but emphasize that their tactics won't work on you. This may aid in reaching a resolution.

Manipulation Robert Noggle, 2025-02-24 Gaslighting flattery misdirection nagging emotional blackmail charm offensives playing on emotions These are all examples of ordinary manipulation Such manipulation is common in everyday

life which is unfortunate since manipulation seems like a bad thing Manipulation Its Nature Mechanisms and Moral Status answers three questions about manipulation what is it how does it work and why is it bad Addressing the first question requires us to find something that all forms of manipulation have in common but which is not shared by other forms of influence Robert Noggle argues that the common feature of all forms of ordinary manipulation is that they are mistake inducing This idea is the basis for the Mistake Account of manipulation which defines manipulation as a kind of influence that operates by introducing a mistake into the mental states or processes of the person being influenced To explain how manipulation works this book explores the psychological levers that manipulators use to get us to make the mistakes that will get us to do what they want These include various cognitive and decision making biases our tendency to choose the lesser good over the greater good when the lesser good is immediately available and the simple fact that human reason is an imperfect thing To explain why manipulation seems like a bad thing Noggle first argues that while manipulation is always presumptively immoral it can be justified in extreme situations He then shows that manipulation s presumptive immorality derives from the fact that it involves getting someone to make a mistake and making a mistake is a bad thing However the most morally egregious instances of manipulation also have bad effects on well being and autonomy This book concludes by applying the Mistake Account to various influences including priming conditioning nudges advertising sales and online influences
