Moving Targets Simon Lavington, 2011-05-19 This book charts the take up of IT in Britain as seen through the eyes of one company. It examines how the dawn of the digital computer age in Britain took place for different applications from early government sponsored work on secret defence projects to the growth of the market for Elliott computers for civil applications. Features charts the establishment of Elliott's Borehamwood Research Laboratories and the roles played by John Coales and Leon Bagrit. Examines early Elliott digital computers designed for classified military applications and for GCHQ. Describes the analogue computers developed by Elliott Automation. Reviews the development of the first commercial Elliott computers and the growth of applications in industrial automation. Includes a history of airborne computers by a former director of Elliott Flight Automation. Discusses the computer architectures and systems software for Elliott computers. Investigates the mergers, takeovers and eventual closure of the Borehamwood laboratories.

The Messages of Its Walls and Fields Katharine Thornton, 2010 *The Messages of its Walls and Fields* seeks to understand the culture of each decade of the School's development. The focus is on the boys themselves but Katharine Thornton also evaluates the policies of succeeding Councils of Governors and the achievements of the thirteen Headmasters who have led Saints from 1847 to 2009. The curriculum story is here the context for advocating sport, the emergence of the external activities of the co-curriculum, the values of a Saints education, the background to each building project, the economy of the School, drama and the arts, science and new laboratories, the ambience of stone trees and green lawn at the heart of a Saints experience. St Peter's College graduates have made significant contributions to the life of South Australia in the professions, in social values, in politics, in sport and in the arts. The history of South Australia must include a knowledge of this School. Here it is in twenty chapters and hundreds of illustrations, not just an entertainment for a week but a reliable record for a lifetime.

War and the Art of Governance Nadia Schadow, 2017 Success in war ultimately depends upon the consolidation of political order. Consolidating the new political order is not separate from war; rather, Nadia Schadow argues that governance operations are an essential component of victory. Despite learning this the hard way in past conflicts from the Mexican War through Iraq and Afghanistan, US policymakers and the military have failed to institutionalize lessons about post-conflict governance and political order for future conflicts. *War and the Art of Governance* distills lessons from fifteen historical cases of US Army military intervention and governance operations from the Mexican War through the wars in Iraq and Afghanistan. Improving outcomes in the

future will require US policymakers and military leaders to accept that the political dimension is indispensable across the full spectrum of war Plans timelines and resources must be shaped to reflect this reality before intervening in a conflict not after things start to go wrong The American historical experience suggests that the country s military will be sent abroad again to topple a regime and install a new government Schadow provides clear lessons that must be heeded before next time
