Elephant Toothpaste

You will need

- A clean plastic soda bottle
- 1/2 cup 20-volume hydrogen peroxide liquid
- 1 Tablespoon of dry yeast
- 3 Tablespoons of warm water
- Liquid dish washing soap
- Food colouring
- Small cup
- Safety goggles

NOTE: Foam will overflow from the bottle; place the bottle on a tray.

1. Hydrogen peroxide can irritate skin and eyes, so put on those safety goggles and ask an adult to carefully pour the hydrogen peroxide into the bottle.

2. Add 8 drops of your favourite food colouring into the bottle.

3. Add about 1 tablespoon of liquid dish soap into the bottle and swish the bottle around a bit to mix it.

4. In a separate small cup, combine the warm water and the yeast together and mix for about 30 seconds.

5. Now the adventure starts! Pour the yeast water mixture into the bottle (a funnel helps here) and watch the foaminess begin!

Elephants Tooth Paste Lesson Plan:

Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2022-04-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al 2014, Wong et al 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al 2021, Seaman et al 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido, Borrachero, Bermejo, Gunning, Duran, Duran 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

The Art of Appraisal Barbara D. Culp, 2017-09-13 The Art of Appraisal saves time and boosts performance with effective tools and a streamlined process. With a few detailed comments, an appraisal can correct weak habits, boost midlevel professionals, and launch excellent teachers into greatness. The Art of Appraisal allows administrators to reap the greatest benefits by creating clarity and efficiency in the process. First, a binary feedback structure ruled by four performance tiers is described. Then, ten key areas of teacher responsibility are defined. Each task is further parsed into four subcategories. Evaluations become faster and easier, and the feedback becomes exponentially more profound. Rich with real world examples and comments about different performance ratings, The Art of Appraisal clarifies and distills the evaluation process. Supplemental chapters are packed with practical comments that can be pasted into evaluations. This structured step-by-step system was developed by Dr. Culp, an educational professional with over forty years of experience. An invaluable tool for administrators and the teachers they evaluate, The Art of Appraisal allows a school's most effective tool to be used in the most efficient manner.

Developing Independent Learning In Science: Practical Ideas And Activities For 7-12 Year Olds Lakin, Liz, 2013-08-01 This practical guide to promoting and developing independent learning is presented in a mixed format using both diagrammatic and textual stimulus. It offers tips and suggestions to achieve effective teaching and learning and raises standards by enabling the pupil to become independent and responsible for their own learning, autonomous in their thinking and creative and critical in their understanding. Liz Lakin describes a progression away from dependency on the classroom teacher whose role changes readily from teacher to facilitator. Drawing on practice-based research, she introduces the skills and processes associated with independent learning through established strategies such as

Assessment for Learning the use of Active learning techniques problem solving activities and peer assessment Each chapter presents tried and tested ideas strategies and activities for the development of higher order skills such as application synthesis evaluation and reflection to use with pupils across the dependency spectrum Several relate to the higher levels of attainment and are therefore applicable at Key Stage 3 The effectiveness of teacher pupil feedback and the role of homework form a significant focus for the latter part of the book A truly thought provoking interactive book with a difference that takes teachers on a learning journey It encourages us to reflect on how we learn how our pupils learn and what the collective implications for effective teaching and helping pupils to construct their learning are Reading and actively engaging with this book is indeed a learning journey invaluable to practitioners The text contains many invaluable references and deals with topics such as the value of homework how people learn and how people respond to techniques addressee to hem in learning situations An essential reading for practicing teachers and particularly students in training and their tutors Dr Sue Dale Tunnicliffe Senior lecturer in Science Education Institute of Education University of London UK There has never been a time when independent learning is more important in school science In *Developing Independent Learning in Science* Liz Lakin challenges the reader to examine how they teach science and why pupils respond as they do The result is a book that should be of great value to those who teach science to 7 12 year olds and to science educators in general A particular strength is the way the author interweaves rigorous thinking about learning with activities for the reader to help them engage with the text In addition there is a mass of useful thinking in here and plenty of classroom suggestions The book is worth reading simply for the honesty of the How not to climb Helvellyn case study Michael J Reiss Professor of Science Education Institute of Education University of London UK In this book Liz Lakin involves the readers in the kind of independent learning that she is describing and advocating It should enable practising teachers to stand back from their work to consider why we want children to learn in a certain way as well as providing useful ideas about how to do it It is written in a personal and engaging style and is a unique addition to books on science teaching Wynne Harlen OBE PhD Visiting Professor of Education University of Bristol UK

Relearning to Teach David Fawcett, 2019-09-16 *Relearning to Teach* challenges the seemingly complex teaching profession and the various initiatives strategies and ideas that are regularly suggested It explores how teaching methods are used without a clear understanding of why which leads to ineffective teaching that is believed to work but ultimately doesn't Cutting through the clutter of conventional teacher guidance David Fawcett tackles myths head on sharing the latest research and explaining how this will look translated to a classroom environment The book breaks down the complexities of teaching into manageable chunks and offers practical advice on how to take charge of your own CPD to become a more reflective and successful practitioner Focusing on what's most relevant and helpful to build effective teaching practice and self improvement it raises key questions such as Is lesson planning just a box ticking exercise Why do students remember in lessons but forget in tests Is asking more questions beneficial Is feedback actually worth it *Relearning to Teach*

is a must read for all teachers looking to pinpoint the why of teaching methods and to gain an understanding of the reasons why various pedagogies are used within the classroom

Teaching Early Years Mathematics, Science and ICT Annette Hilton, 2020-07-22 When young children first arrive at school they generally know how to use a mobile phone and a tablet and how to count share and measure They have a sense of wonder about the world around them They expect to further interact with technology and to build and extend their mathematics and science knowledge Teaching Early Years Mathematics Science and ICT shows how teachers of children in their first three years of formal schooling can guide students in developing a sound understanding of the key concepts in mathematics and science in classroom and field activities It shows how to select appropriate educational technology and effectively and routinely integrate it into the learning experience as part of students wider classroom learning Throughout the authors make connections between children s out of school and in school experiences as well as connections across key learning areas They provide real classroom examples of learning experiences which can be adapted for different year levels A reflection template assists teachers in planning and successfully implementing teaching strategies to meet curriculum requirements Teaching Early Years Mathematics Science and ICT helps teachers bridge theory and practice in teaching children aged 5 to 8 years *Totally Tweens and Teens* Diane P. ,1965 Powerful Ideas of Science and How to Teach Them Jasper Green,2020-07-19 A bullet dropped and a bullet fired
from a gun will reach the ground at the same time Plants get the majority of their mass from the air around them not the soil
beneath them A smartphone is made from more elements than you Every day science teachers get the opportunity to blow
students minds with counter intuitive crazy ideas like these But getting students to understand and remember the science
that explains these observations is complex To help this book explores how to plan and teach science lessons so that students
and teachers are thinking about the right things that is the scientific ideas themselves It introduces you to 13 powerful ideas
of science that have the ability to transform how young people see themselves and the world around them Each chapter tells
the story of one powerful idea and how to teach it alongside examples and non examples from biology chemistry and physics
to show what great science teaching might look like and why Drawing on evidence about how students learn from cognitive
science and research from science education the book takes you on a journey of how to plan and teach science lessons so
students acquire scientific ideas in meaningful ways Emphasising the important relationship between curriculum pedagogy
and the subject itself this exciting book will help you teach in a way that captivates and motivates students allowing them to
