Note: Certain items shown in the menu above may not be applicable to your specific phone system. Consult your System Administrator for more information.

Programmable feature keys

There are two **methods** for programming your phone.

- **Direct programming** — Select the key you want to program and hold it down for at least two seconds. This not only initiates programming but also lets you immediately program that specific key.

- **Traditional programming** — Press **PROGRAM**. The Verbal User Guide will speak to you, walking you through the full menu, during which you can choose the appropriate option.

The programmable feature keys can be programmed as:

- **Line keys** — If programmed with a two-digit line number, the key will become a line key providing lamp information and outside line access.

- **Station keys** — If programmed with a three-digit extension number, the key will provide station lamp status and direct station access and transfer.

- **Speed-dial keys** — Can be used for automatic dialing of frequently called outside numbers. Enter the line access code and then your phone number.

- **Additional feature keys** — Depending on your system, these may include day/night control, service observing, agent log-in, system speed dial, personal greeting, etc. See the System Administrator for assistance.

Special features

Monitor mode

You can program your phone to allow hearing a message as it is being left in your mailbox, for your selective interception.

Call forwarding

On a 24-Key Feature Phone: Dial **5 6 5** and then press a station key to forward your call to that station. To disable call forwarding, dial **5 6 5** and hang up. You can create a call forward key by assigning **5 6 5** to a programmable feature key.

On a 9-Key Feature Phone: Press **CFWD** and then press a station key (or enter an extension) to forward your call to that station. To disable call forwarding, dial **CFWD #** and hang up.

Message Recycle Bin (un-delete)

Your phone system stores your 10 most recently deleted messages in a Message Recycle Bin. **(PROGRAM 8)** to allow you to recover messages that may have been deleted in error.

Off-hook indicator/message light

The red message light, located at the top of the phone, indicates three conditions. A phone that's off-hook glows solid red (first priority), continuously "flutters" when ringing (second priority), and blinks when that station has new voice mail waiting (third priority). The indicator will light according to the priority of the condition.

Headset jack

Your phone may also be equipped with a **headset jack** (located on the bottom of the phone). To use a headset, first assign **5 5 5** to a programmable feature key, making it a **headset key**, then plug the headset into the phone. To answer a call, press the headset key you programmed (to release the call, press the headset key again). You can use the handset at any time; however, to switch back to headset mode, you must press the programmed headset key before placing the handset back in its cradle. (See the User's Guide for more details.)

Note: You must program headset operation **(PROGRAM 2 3)** and use an external headset amplifier if you are using an ESI phone without a headset jack on an ESI system manufactured in 2003.

Using help mode

Your phone's help mode is designed to help you learn about phone features, how to use your phone, how to use voice mail, and how to handle calls and messages (user tutorial). To access one of these topics, press **HELP** and choose from the menu.

While programming a feature on your phone, you can press **HELP** to hear a more detailed description of that feature.

The on-board user tutorial — **HELP 4** — explains all aspects of call and message handling in a logical, step-by-step manner.

Using voice mail

Note: Certain ESI phone systems have either an **Integrated Answering Machine** (which works differently than shown below) or no voice mail at all. Consult your System Administrator for more information.
If you have new messages, your display will show the number of new and old messages in your mailbox.

Retrieving messages from your station

1. Press **VOICE MAIL**.
2. When prompted, enter your password (if required). The default password is **8** (meaning, no password required).

During playback of a message, the display will show the originator of the message, the position of the message, whether it's new or old, and the time/date of the message.

You can press any of the following keys anytime during the message or during the prompt following the message:

1 **Pause** — Pauses playback for one minute or until pressed again.

2 **Time/date to number** — Toggles the display between the time/date and the Caller ID number (if available).

3 **Reply** — To automatically reply to a message from another user (within the system). Begin recording your reply at the tone, press **1** to stop. You will then be returned to the original message for further action.

4 **Back up** — Backs up (rewind) playback four seconds for each time you press it during message playback. If pressed after the message has finished, returns you to the message's beginning.

6 **Fast forward** — Advances playback four seconds each time you press it.

8 **Move** — Moves a copy of the message to another user's mailbox or to a Guest Group. If you wish to add an introduction, press **1** when prompted. The phone system will respond with the mailbox greeting and record tone. When you've finished your recording, press **1** to stop.

7 **Delete** — Deletes the message.

9 **Save** — Saves the message. It will be played as an old message the next time messages are retrieved.

Note: **6 6** saves the message as a new message.

Hang up when finished. (If you hang up while a message is playing back, the message still remains a "new" message.)

Retrieving messages from a remote location

1. At the main greeting, either press **#** and enter your mailbox number, **#** or have the operator transfer you by pressing **VOICE MAIL**, and then **#**, and entering your mailbox number.
2. When prompted, enter your password (if required). The default password is **8** (meaning, no password required).

The phone system will announce the number of new and old messages and play the oldest new message.

The additional key functions listed below may be used from a remote location.

2 **Hear time/date** — Pauses the message, plays the time/date of the message and then resumes playback.

5 **Access user programming** — Lets you change the personal greeting or password.

Note: Fast forward is not available from a remote location.

8 **Main greeting** — Returns you to the main greeting.

0 **Operator** — Transfers you to the operator.

1 **Leave a message in another mailbox** — When prompted, enter the user's mailbox number.

3 **To disconnect** — Use before hanging up (if pressed during playback of a message, the message will be saved).

Mailbox personal greetings

You can record up to three personal greetings **(PROGRAM 1)** and then change between them as desired.

Example: "Hi, this is Bill. I'm away from my desk or on the phone. You may reach the operator by dialing 0 now, or leave me a detailed message and I'll respond to it promptly."
