Implementation Guide for IBM Elastic Storage System 3000 Brian Herr, Chiahong Chen, Farida Yaragatti, John Lewars, Jonathan Terner, Luis Bolinches, Olaf Weiser, Puneet Chaudhary, Ravindra Sure, Robert Guthrie, Stefan Roth, Todd M Tosseth, Vasfi Gucer, Wesley Jones, IBM Redbooks, 2021-06-28 This IBM Redbooks publication introduces and describes the IBM Elastic Storage Server 3000 ESS 3000 as a scalable high performance data and file management solution. The solution is built on proven IBM Spectrum Scale technology formerly IBM General Parallel File System IBM GPFS. IBM Elastic Storage System 3000 is an all Flash array platform. This storage platform uses NVMe attached drives in ESS 3000 to provide significant performance improvements as compared to SAS attached flash drives. This book provides a technical overview of the ESS 3000 solution and helps you to plan the installation of the environment. We also explain the use cases where we believe it fits best. Our goal is to position this book as the starting point document for customers that would use ESS 3000 as part of their IBM Spectrum Scale setups. This book is targeted toward technical professionals consultants technical support staff IT Architects and IT Specialists who are responsible for delivering cost effective storage solutions with ESS 3000.

SAP HANA and ESS: A Winning Combination Olaf Weiser, IBM Redbooks, 2018-08-16 SAP HANA on IBM POWER is an established HANA solution with which customers can run HANA based analytic and business applications on a flexible IBM Power based infrastructure. IT assets such as servers storage and skills and operation procedures can easily be used and reused instead of enforcing more investment into dedicated SAP HANA only appliances. In this scenario IBM Spectrum™ Scale as the underlying block storage and files system adds further benefits to this solution stack to take advantage of scale effects higher availability simplification and performance. With the IBM Elastic Storage™ Server ESS based on IBM Spectrum Scale™ RAID capabilities are added to the file system. By using the intelligent internal logic of the IBM Spectrum Scale RAID code reasonable performance and significant disk failure recovery improvements are achieved. This IBM Redpaper™ publication focuses on the benefits and advantages of implementing a HANA solution on top of IBM Spectrum Scale storage file system. This paper is intended to help experienced administrators and IT specialists to plan and set up an IBM Spectrum Scale cluster and configure an ESS for SAP HANA workloads. It provides important tips and best preferred practices about how to manage IBM Spectrum Scale's availability and performance. If you are familiar with ESS IBM Spectrum Scale and IBM Spectrum Scale RAID and you need only the pertinent documentation about how to configure a IBM Spectrum Scale cluster with an ESS for SAP HANA see Chapter 5 IBM Spectrum Scale customization for HANA on page 25. Before reading this IBM Redpaper publication you should be familiar with the basic concepts of IBM Spectrum Scale and IBM Spectrum Scale RAID. This IBM Redpaper publication can be helpful for architects and specialists who are planning an SAP HANA on POWER deployment with the IBM Spectrum Scale file system. For more information about planning considerations for Power see the SAP HANA on Power Planning Guide **Alcatel-Lucent Scalable IP Networks**

SAP HR TIME MANAGEMENT P. K. AGRAWAL,2010-08-17 This book explains all the concepts underpinning SAP s HR Time Management Module It is a comprehensive technical manual which explains every single node of the User Menu and the Configuration The book first gives an overview of a concept explaining what it is how it is used and how it relates to the other concepts It then explains its properties which are fields in a configuration node This book is designed to be used both as a reference manual and a learning guide As a learning guide it offers four views each for a different target audience It can be read from the Senior Management s perspective to gain a broad understanding of the subject and what SAP can do for them Business Process Owners can achieve a higher level of understanding by getting to know more of SAP concepts and how to perform different tasks in SAP Users can acquire a thorough understanding of different tasks and concepts underlying them Functional consultants and proficient users can read the book to gain a complete understanding of the system As a technical reference the book can be used to locate the relevant material through the Table of Contents Index SAP Menu and SAP Customizing Implementation Guide IMG The last two follow the Table of Contents If the reader is in SAP s User Menu or Configuration the chapter number for these nodes can be found in SAP Menu and IMG If a node is not covered in the book

the reason for not doing so is mentioned. The implementation of SAP HR Time Management and documentation can also be guided by the structure of this book. A BETTER WORLD There is a lot we can do to make our world a better world just as we discover better ways to support our businesses. Read short articles inside on some of the ideas of World Integration and Improvement Initiative. World Government 691 World Language 693 Good Governance 699 City without Traffic Lights 705 SAP is a great software. One needs to fully understand its features in order to effectively exploit them for the benefit of customers. Mr Agrawal's books on SAP HR have a unique approach. A chapter usually focuses on a single business concept and discusses the user interface as well as its associated configuration. This logical division makes it easier for readers to understand the functionality. Another important feature of these books is the level of detail. Each screen and each field in a screen is explained. Explanation includes meaning, use case and in some cases guidelines. Details are balanced by overviews explaining the concepts and their relationships. While explaining functionality, Mr Agrawal has taken efforts to highlight what can be done and how it is to be done. This is particularly important for less experienced users and consultants. Indicating chapter numbers against each menu and configuration item is a very useful innovation as it establishes direct link between the SAP system and the book. Another useful feature is that these books can be read not only by consultants but also by users, business process owners and even by senior managers. The importance of each topic for each category of users is specified. Mr Agrawal has taken considerable pain in writing these books and I congratulate Mr Agrawal on his achievement and thank him for his contribution to the SAP community. Implementing SAP® CRM Vivek Kale, 2014-12-03 In today's competitive business environment most companies realize that the better they can manage their customer relationships the more successful they will become. Customer Relationship Management CRM software systems are key tools for companies to manage the customer facing processes of their businesses. However many companies have resisted implementing this most critical customer oriented application due in large part to the lack of a single point resource on implementing a CRM system. This book attempts to fill that gap. Implementing SAP CRM will help technologists and managers come to grips with the vision, concept and technology of CRM. It begins by laying out the groundwork for understanding CRM. It explains the concept and context of CRM and the tangible business benefits of CRM adoption. Demonstrating a professional approach to the evaluation and selection of SAP it details the critical success factors CSFs, patterns and anti patterns of a successful SAP CRM implementation. CRM implementations can add significant benefit to the company's bottom line only if the company first transforms itself into a customer centric and customer responsive enterprise. This book explains what it means to be a customer centric and responsive enterprise and provides a framework for business operations based on customer relationships rather than the traditional four Ps product positioning price promotion. It further spells out business process reengineering BPR strategies to configure internal business processes and operations with SAP CRM to improve customer facing strategies services and relationships.
