Introduction

Michel Montaigne (1533-1592) is credited with inventing the essay form with his classic work *Essais* (1st Edition, 1580). He lived and reworked his essays in a French rural retreat after being the Mayor of Bordeaux from 1581-1585. Since then, essays have traditionally been short statements feeling their way towards expression of what needs a far wider space to exhaust. Using the Montaigne essay style here, I have not provided specific references for statements throughout this article. Interested readers can find my complete resume/curriculum vitae at www.bobkrone.com/node/103.

Every human being has a personal life philosophy. It was formed by a complex lifetime mix of genetics, environment, and learning over time. A small percentage of humans have explicitly documented their own philosophy as an analysis of their own value systems, or to understand the values, sources, and influences on their beliefs over time. My definition of *values* – created during my doctoral studies at UCLA – is “Values are principles or things preferred.” That is different from the economic definition of value, which is usually oriented toward quantitative worth. Philosophy and values are not synonymous, but have many commonalities. Philosophy is oriented toward total life meaning, while values form the components of that totality.

Most people’s personal philosophy is created and evolves from experiences and just living, not from conscious reflection and design. Is that not the best way to develop philosophy? For some, it may be. But the belief I bring to this article is that individual, family, group, organization, agency, business, society, national, international, and human existence would improve with wiser and more explicit self-examination of values and philosophy. There is value in knowing answers to the questions: *What do I believe?* and *How should my beliefs impact my behavior?*

Dr. Paul R. Cone was my mentor for two university faculty appointments – the University of Southern California in 1975 and La Sierra University, Riverside, California in 1992. Paul was a wise, compassionate, and brilliant leader in both academics and business. One of the many lessons I learned from Paul Cone he had condensed into

A Short History of My Philosophy Agnes Heller, 2011-01-01 *A Short History of My Philosophy* is an autobiographic account of Agnes Heller's intellectual and academic career. It traces the development of ideas and gives a thorough account of some of Agnes Heller's most influential works.

The Importance of Philosophy in Teacher Education Andrew Colgan, Bruce Maxwell, 2019-08-29 *The Importance of Philosophy in Teacher Education* maps the gradual decline of philosophy as a central integrated part of educational studies. Chapters consider how this decline has impacted teacher education and practice, offering new directions for the reintegration of philosophical thinking in teacher preparation and development. Touching on key points in history, this valuable collection of chapters accurately appraises the global decline of philosophy of education in teacher education programs and seeks to understand the external and endemic causes of changed attitudes towards a discipline which was once assigned such a central place in teacher education. Chapters illustrate how a grounding in the theoretical and ethical dimensions of teaching, learning, and education systems contribute in meaningful ways to being a good teacher and trace the consequences of a decline in philosophy on individuals' professional development and on the evolution of the teaching profession more broadly. With this in mind, the text focusses on the future of teacher education and considers how we can ensure that philosophy of education feeds into the excellence of teaching today. This book will be of great interest to graduate/postgraduate students as well as research scholars in the field of educational philosophy and history of education. In addition, it will be useful for those involved in teacher education and in particular course/module and program development.

A+ Guide to Application Essays Alison Plus, 2017-01-31 You must write an application essay. This essay might accompany an application to college, graduate school, or professional school. Or it might be part of a job application or a request for a scholarship or other funding. Regardless of the nature of the application, all of these essays are united by a common purpose: you want something, and this essay is part of the formal request made to the person or organization with the power to give it to you. Even though you might have seen other application essays, you still might not know how to compose yours. Maybe you have never written an essay like this before, so you are unsure about how it differs from other kinds of essays. Maybe you have written an essay like this in the past, but you were unhappy with the product or the result, and you want to improve your chances this time. Maybe no matter your skills and experiences, you are just looking for extra help so that this kind of essay will be easier to complete. Few of us have been taught how to write this type of essay. Is it casual or academic? Is it supported with research? How much should you reveal about yourself? These and many more questions can make it tricky to even know where to begin. And it is very likely that you might not have anyone to help you with this. Because application essays are extra-curricular, even if you are a current student with access to writing instructors, your application essay will not be part of that syllabus. The writing expert teaching your class might not be available to instruct you in this type of writing in their time off. This booklet can help you by showing you the complete process of writing

an application essay for a scholarship academic program or employment opportunity This practical systematic method will start with a basic discussion of the purpose of application essays and end with a final proofreading In between that first and last step you will learn how to write each section of an application essay piece by piece These sectional breakdowns show you exactly what to include in different places within the essay You will no longer need to guess what to write and where to write it By using the breakdown the various pieces of the document will work together to create a coherent and complete whole Working the sections carefully will teach you the writing method for this type of essay Then when you must write another application essay use this booklet as a reference to help you remember what each section can include The more you use the method the easier it will be
