

GATTACA

Reflection Questions

Answer the following questions based on your knowledge of the Living Environment, your personal opinions, and the movie "GATTACA".

1. Why do you think Vincent's father decided to name him "Vincent Anton" rather than "Anton"?
2. How was Vincent's childhood/family life affected by his genetic profile?
3. How was Vincent's adult life affected?
4. What qualities does Vincent possess that contribute to his success?
5. Does Jerome have any weak qualities? What are they?
6. Why do you think the writer/director chose the name "Gattaca" for this film, and for the place where Vincent worked?
7. Why do you think Lamar's son was a "big fan" of Vincent?
8. What are the positive and negative aspects of the GATTACA world?
9. "This child is you, simply the best of you. You could conceive a hundred times and never achieve the same result." Explain this statement using the terms: HOMOLOGOUS CHROMOSOMES and ALLELES.
10. What are "valids" and "in-valids" in the story? Explain in definition.
11. During the car search in the tunnel, Vincent (who is with Irene) tells the tester NOT to take a saliva sample (implying the sample might be "contaminated"), but rather, to take a blood sample. What did he mean by the saliva being "contaminated", and, what was the REAL reason Vincent did not want a saliva sample to be taken?
12. Is it true that you are more than the sum of your genes?
13. What evidence pointed towards an "in-valid" as the murderer?
14. What major surgery did Vincent have to enhance his genetic "imperfections?"

Transcend the Flesh Tobiasz Mazan, 2015-04-17 Do you want to live forever End all suffering Transcend bodily fluids and reach the stars Sure But you may pay for it with your soul Film and Philosophy, 2007 **Classic Questions and Contemporary Film** Dean A. Kowalski, 2015-08-26 Featuring significant revisions and updates Classic Questions and Contemporary Film An Introduction to Philosophy 2nd Edition uses popular movies as a highly accessible framework for introducing key philosophical concepts Explores 28 films with 18 new to this edition including Eternal Sunshine of the Spotless Mind Hotel Rwanda V for Vendetta and Memento Discusses numerous philosophical issues not covered in the first edition including a new chapter covering issues of personal identity the meaningfulness of life and death and existentialism Offers a rich pedagogical framework comprised of key classic readings chapter learning outcomes jargon free argument analysis critical thinking and trivia questions a glossary of terms and textboxes with notes on the movies discussed Revised to be even more accessible to beginning philosophers **The Human Genome Project in College Curriculum** Aine Donovan, Ronald Michael Green, 2008 Begun formally in 1990 the U S Human Genome Project's HGP goals were to identify all the 20 000 to 25 000 genes in human DNA determine the sequences of the three billion chemical base pairs that make up human DNA store this information in databases improve tools for data analysis and transfer related technologies to the private sector It was the first large scientific undertaking to address potential issues that arose from project data and opened up vast possibilities for the use of genetic data and the alteration of our genetic makeup This volume is the first to address the diverse range of ethical issues arising from the HGP and enables professors to bring this critically important topic to life in the classroom Philosophy Through Film Mary M. Litch, 2002 Philosophy Through Film offers a stimulating new way to explore the basic questions of philosophy Each chapter uses a popular film to examine one such topic from free will and skepticism to personal identity and artificial intelligence in an approachable yet philosophically rigorous manner A wide range of films are discussed including more recent releases like Being John Malkovich Total Recall and Boys Don't Cry and classics like Rashomon and Crimes and Misdemeanors all readily available through major video rental chains This unique and engaging introduction provides an exciting new way to learn about philosophy and connects complicated philosophical questions to the familiar settings of popular culture **Editing the Soul** Everett Hamner, 2017-09-28 Personal genome testing gene editing for life threatening diseases synthetic life once the stuff of science fiction twentieth and twenty first century advancements blur the lines between scientific narrative and scientific fact This examination of bioengineering in popular and literary culture shows that the influence of science on science fiction is more reciprocal than we might expect Looking closely at the work of Margaret Atwood Richard Powers and other authors as well as at film comics and serial television such as Orphan Black Everett Hamner shows how the genome age is transforming both the most commercial and the most sophisticated stories we tell about the core of human personhood As sublime technologies garner public awareness

beyond the genre fiction shelves they inspire new literary categories like slipstream and shape new definitions of the human the animal the natural and the artificial In turn what we learn of bioengineering via popular and literary culture prepares the way for its official adoption or restriction and for additional representations By imagining the connections between emergent gene testing and editing capacities and long standing conversations about freedom and determinism these stories help build a cultural zeitgeist with a sharper more balanced vision of predisposed agency A compelling exploration of the interrelationships among science popular culture and self Editing the Soul sheds vital light on what the genome age means to us and what s to come

Family Communication about Genetics Clara L. Gaff,Carma L. Bylund,2010-07-01 Genetics is in all senses a family affair The diagnosis of a genetic condition affects not only the patient and biological family members who may themselves be at risk but also family more generally as support may be sought from those considered kin and who may or may not be at risk themselves It is considered best practice in genetic consultations to explore who will be informed within the family when a genetic condition or risk is diagnosed particularly when the health of other family members is at risk There is little guidance or consensus on how to achieve the implicit goal of informed family members while respecting patient confidentiality however There is a need for practitioners to be aware of the dynamics of family communication and to have guidance about how they may sensitively facilitate communication about genetics within families This handbook facilitates the development of clinical practices relating to family communication about genetics Relevant theories of family communication are summarized and related to a clinical genetics milieu and from this frameworks for practitioners are presented A book of this nature is particularly timely as the completion of the Human Genome Project will result in an unprecedented amount of information about genetic constitution and health risks becoming available to individuals and their families The presence of a potential genetic condition in a family is not a new phenomenon However the growth in testing for genetic conditions common complex conditions and variants that may influence health as well as drug metabolism means that a greater number of individuals will face decisions about communicating this information to their relatives Many health professionals in all levels of health care will be confronted with issues of responsibility and practice in family communication about genetic information as they become providers of this testing
