Learning to Teach Geography in the Secondary School Mary Biddulph, David Lambert, David Balderstone, 2015-05-20 Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography. It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons. It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education. The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching and debate key questions about the nature and purpose of the subject in school. Fully revised and updated in light of extensive changes to the curriculum as well as to initial teacher education, the new edition considers the current debates around what we mean by geographical knowledge and what's involved in studying at Masters level. Key chapters explore the fundamentals of teaching and learning geography, Why we teach and what to teach, Understanding and planning the curriculum, Effective pedagogy, Assessment, Developing and using resources, Fieldwork and outdoor learning, Values in school geography, Professional development. Intended as a core textbook and written with university and school based initial teacher education in mind, Learning to Teach Geography in the Secondary School is essential reading for all those who aspire to become effective, reflective teachers. Praise for previous editions of Learning to Teach Geography in the Secondary School: This is a practical and visionary book as well as being superbly optimistic. It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere. Practical activities and ideas are set within a carefully worked out authoritative conceptual framework. The Times Educational Supplement. This is a modern, powerful, relevant and comprehensive work, a standard reference for many beginning teachers on geography initial teacher training courses. Educational Review. **The Inequality Paradox** Douglas McWilliams, 2018-10-09 In his illuminating new book Douglas McWilliams argues that inequality is largely driven not by a conspiracy of the rich as Thomas Piketty suggests but by technology and globalization that have led to the paradox of rising inequality even as worldwide poverty drops. But what are the implications of this seeming contradiction and what ultimately drives the global distribution of wealth? What can societies do to reshape capitalism for the 21st century? Drawing on the latest research, McWilliams investigates how wealth is concentrated and why it persistently remains in the hands of very few. In accessible and thought provoking prose, McWilliams poses a comprehensive theory on why capitalism has not met its match in the form of increasingly disparate income distribution but warns of the coming wave of technological development, the fourth industrial revolution, that threatens to create a scarcity of unskilled jobs that will lead to even greater inequality and explains what

governments can do to prepare for this From the inquisitive layperson to the professional economist or policymaker The Inequality Paradox is essential reading for understanding the global economy in its present state McWilliams is a fresh authoritative voice entering the global discussion making this book indispensable in preparing for the imminent economic challenges of our changing world **The Times Index** ,2007 Indexes the Times and its supplements **Sqa Specimen Paper 2014 Past Paper National 5 Geography and Hodder Gibs Sqa** (Hodder Ed),2014-09-26 **GCSE Geography** John Pallister,2003
