*Sociology and Its Publics* Terence C. Halliday, Morris Janowitz, 1992-10-15 Sociology faces troubling developments as it enters its second century in the United States A loss of theoretical coherence and a sense of disciplinary fragmentation a decline in the quality of its recruits the cooptation of its clients a muted public voice and sinking prestige in governmental circles these are only a few of the trends signalling a need for renewed debate about how sociology is organized In this volume some of the most authoritative voices in the field confront these conditions offering a variety of perspectives as they challenge sociologists to self examination *Doctoral Studies at Catie* , **Research Report** , 1984 **Getting a PhD in Economics** Stuart J. Hillmon, 2014-01-06 Considering a graduate degree in economics Good choice the twenty first century financial crisis and recession have underscored the relevance of experts who know how the economy works should work and could work However Ph D programs in economics are extremely competitive with a high rate of attrition and a median time of seven years to completion Also economic professions come in many shapes and sizes and while a doctoral degree is crucial training for some it is less beneficial for others How do you know whether a Ph D in economics is for you How do you choose the right program and how do you get the right program to choose you And once you ve survived years of rigorous and specialized training how do you turn your degree into a lifelong career and meaningful vocation Getting a Ph D in Economics is the first manual designed to meet the specific needs of aspiring and matriculating graduate students of economics With the perspective of a veteran Stuart J Hillmon walks the reader through the entire experience from the Ph D admissions process to arduous first year coursework and qualifying exams to armoring up for the volatile job market Hillmon identifies the pitfalls at each stage and offers no holds barred advice on how to navigate them Honest hard hitting and at times hilarious this insider insight will equip students and prospective students with the tools to make the most of their graduate experience and to give them an edge in an increasingly competitive field *Statement of Findings, University of California, Los Angeles* , 1990 **Score Reporting Research and Applications** Diego Zapata-Rivera, 2018-08-16 Score reporting research is no longer limited to the psychometric properties of scores and subscores Today it encompasses design and evaluation for particular audiences appropriate use of assessment outcomes the utility and cognitive affordances of graphical representations interactive report systems and more By studying how audiences understand the intended messages conveyed by score reports researchers and industry professionals can develop more effective mechanisms for interpreting and using assessment data Score Reporting Research and Applications brings together experts who design and evaluate score reports in both K 12 and higher education contexts and who conduct foundational research in related areas The first section covers foundational validity issues in the use and interpretation of test scores design principles drawn from related areas including cognitive science human computer interaction and data visualization and research on presenting specific types of assessment information to various audiences The second section presents real world applications of score report design and evaluation

**Educating Scholars** Ronald G. Ehrenberg,Harriet Zuckerman,Jeffrey A. Groen,Sharon M. Brucker,2009-09-28 Meeting the challenges faced by today's U.S. doctoral humanities programs Despite the worldwide prestige of America's doctoral programs in the humanities all is not well in this area of higher education and hasn't been for some time The content of graduate programs has undergone major changes while high rates of student attrition long times to degree and financial burdens prevail In response the Andrew W. Mellon Foundation in 1991 launched the Graduate Education Initiative (GEI) the largest effort ever undertaken to improve doctoral programs in the humanities and related social sciences The only book to focus exclusively on the current state of doctoral education in the humanities *Educating Scholars* reports on the GEI's success in reducing attrition and times to degree the positive changes implemented by specific graduate programs and the many challenges still to be addressed Over a ten year period the Foundation devoted almost eighty-five million dollars through the GEI to provide support for doctoral programs and student aid in fifty-four departments at ten leading universities The authors examine data that tracked the students in these departments and in control departments as well as information gathered from a retrospective survey of students They reveal that completion and attrition rates depend upon financial support the quality of advising clarity of program requirements and each department's expectations regarding the dissertation The authors consider who earns doctoral degrees what affects students' chances of finishing their programs and how successful they are at finding academic jobs Answering some of the most important questions being raised about American doctoral programs today *Educating Scholars* will interest all those concerned about our nation's intellectual future
