Green Housing Guide For Hot Climate:

Bioclimatic Architecture in Warm Climates Manuel Correia Guedes, Gustavo Cantuaria, 2019-04-30 This book provides a comprehensive hands on approach to bioclimatic building design in Africa Bioclimatic design is at the core of urban sustainability and is a critical issue in Africa where imported building typologies are being used at an increasing pace disregarding the local context and consequently causing damage to the environment to the economy and to the culture itself This book provides a concise set of sustainable design guidelines to be applied in both new buildings and the refurbishment of old buildings and integrates bioclimatic design strategies with other sustainability issues such as cultural aspects affordability and urban planning Chapters are fully illustrated with photographs and drawings and include best practice examples and strategies making it accessible to engineers architects students and a broad range of professionals in the building industry Encompasses all climatic regions in Africa Integrates bioclimatic design strategies with other sustainability issues Discusses new design to refurbishment from urban to rural including office buildings residential tourism social housing and self building [Guide to Green Building Rating Systems](#) Linda Reeder, 2010-03-29 The one stop guide for choosing a green building rating system Today sustainability is a growing concern for the architects designers builders and owners of commercial and residential buildings Meeting the requirements of a rating system provides a metric to evaluate and set priorities But the variety and complexity of methods available to assess the eco friendliness of a building can seem overwhelming Guide to Green Building Rating Systems informs readers about the rating system selection process Comparing essential issues such as cost ease of use and building performance this book offers solid guidance that will help readers find the rating system that best fits their needs This easy to follow reference includes An overview of the major national rating systems including LEED Green Globes the National Green Building Standard and ENERGY STAR An in depth look at each rating system including its evolution objectives point structure levels of certification benefits and shortcomings How the ratings systems work for different types of buildings commercial multi family residential and single family residential construction Illustrated case studies from different climate regions with project descriptions cost data and lessons learned by design teams constructors and owners An overview of local regional and international rating systems Guide to Green Building Rating Systems demystifies complex material making this book an essential reference for building professionals engaged in or wishing to pursue sustainable building practices **The Eco-Home Design Guide** Christopher Day, 2015-10-29 The key principles of designing a pleasant comfortable and healthy eco home with a foreword written by HRH The Prince of Wales now King Charles III Designing an eco home is much more about working with your house s location and situation than relying on intrusive technology and hi tech materials With the soaring energy bills and the climate crisis it is now more important than ever to invest in a home that is considerate of keeping heat in In this handbook architect Christopher Day draws on his extensive experience to explain the key principles of eco home design using common sense

methods Packed full of practical information it includes several case studies of eco homes reviewing with hindsight what worked well and what could have been better There is also guidance on how to generate energy upgrading old buildings and site planning With beautifully hand drawn illustrations Christopher explores how to use local topography combined with landscaping to improve your home s microclimate and keep your house dry and warm in the winter and cool in the summer There are also handy tips on how to minimise hidden environmental impacts and ideas on ways to make your home a safe and healthy place both emotionally and physically The Eco Home Design Guide is essential for anyone who wants to create a attractive environmentally friendly home that is in harmony with its location **Eco-resorts** Zbigniew

Bromberek,2009-06-04 Eco Resorts is a design guide for low impact environmentally friendly tourist resorts in the tropics The book is the first to offer architects practical detailed guidance in developing resort buildings that work with a tropical climate and meet the needs and expectations of the client and building inhabitants The book includes both architectural design and material solutions supported by theoretical principles to present a sustainable approach to resort design It demonstrates that tropical resort buildings do not necessarily require large energy input in compliance with green building standards Case studies show how principles of sustainable design have been successfully applied in tropical environments Written by an industry insider with practical design experience knowledge and expertise Demonstrates design practices related to site planning and layout and re assesses best practices for a tropical environment allowing architects to apply design principles to their own projects Includes international case studies from several countries to illustrate best practice from a variety of tropical climate destinations around the world Z Zbigniew Bromberek PhD is an architect educated and registered in Poland and postgraduate educated and residing in Australia Z has been practising and teaching architecture for nearly 30 years He has been involved and associated with various educational institutions and professional organizations in a number of countries around the world Before the current appointment as Senior Lecturer in Architecture at the University of Tasmania Z spent three years as Lecturer in Environmental Design at the University of Queensland and two years as Guest Professor in Architectural Design in Nanjing PR China He was also the President of the Architectural Science Association ANZAScA for three consecutive terms in 2000 05 Z s major research interests include design environment interaction low impact architecture and re integration of architecture as an expression of a multi disciplinary approach to design

Bioclimatic Housing Richard Hyde,2012-04-27 In the search for sustainable architecture there is growing interest in the relationship between nature and design In this vital new book the term bioclimatic relating to the dynamic between climate and living organisms is applied by the authors in focusing on countries where housing requires cooling for a significant part of the year In this context Bioclimatic Housing covers creative vernacular architecture to present both the theory and practice of innovative low energy architecture The book interweaves the themes of social progress technological fixes and industry transformation within a discussion of global and country trends climate types solutions and technologies Prepared

under the auspices of a 5 year International Energy Agency IEA project and with case studies from Iran Malaysia Australia Japan Sri Lanka and Italy this is a truly international and authoritative work providing an essential primer for building designers builders developers and advanced students in architecture and engineering Heating, Cooling, Lighting Norbert Lechner, 2014-10-13 Sustainable environmental control through building design Heating Cooling and Lighting is the industry standard text on environmental control systems with the emphasis on sustainable design By detailing the many factors that contribute to the comfort in a building this book helps architects minimize mechanical systems and energy usage over the life of the building by siting building design and landscaping to maximize natural heating cooling and lighting This new fourth edition includes new information on integrated design strategies and designing for the Tropics Resources include helpful case studies checklists diagrams and a companion website featuring additional cases an image bank and instructor materials Designing buildings that require less energy to heat cool and light means allowing the natural energy of the sun and wind to reduce the burden on the mechanical and electrical systems Basic design decisions regarding size orientation and form have a great impact on the sustainability cost and comfort of a building Heating Cooling and Lighting provides detailed guidance for each phase of a design project Readers will Understand the concept of sustainability as applied to energy sources Review the basic principles of thermal comfort and the critical role of climate Learn the fundamentals of solar responsive design including active and passive solar systems as well as photovoltaics Discover how siting architectural design and landscaping can reduce the requirements for mechanical and electrical systems In sustainable design mechanical and electrical systems should be used to only accomplish what the architect could not by the design of the building itself With this in mind designers require a comprehensive understanding of both the properties of energy and the human factors involved in thermal comfort Heating Cooling and Lighting is the complete industry leading resource for designers interested in sustainable environmental control *Heating, Cooling, Lighting* Norbert M. Lechner, Patricia Andrasik, 2021-09-20 The essential guide to environmental control systems in building design For over 25 years Heating Cooling Lighting Sustainable Design Strategies Towards Net Zero Architecture has provided architects and design professionals the knowledge and tools required to design a sustainable built environment at the schematic design stage This Fifth Edition offers cutting edge research in the field of sustainable architecture and design and has been completely restructured based on net zero design strategies Reflecting the latest developments in codes standards and rating systems for energy efficiency Heating Cooling Lighting Sustainable Design Strategies Towards Net Zero Architecture includes three new chapters Retrofits Best practices for efficient energy optimization in existing buildings Integrated Design Strategies for synergizing passive and active design Design Tools How to utilize the best tools to benchmark a building s sustainability and net zero potential Heating Cooling Lighting Sustainable Design Strategies Towards Net Zero Architecture is a go to resource for practicing professionals and students in the fields of environmental systems technology or design environmental design systems construction technology and sustainability

Eco-Homes Jenny Pickerill,2016-01-15 It is widely understood that good affordable eco housing needs to be at the heart of any attempt to mitigate or adapt to climate change This is the first book to comprehensively explore eco housing from a geographical social and political perspective It starts from the premise that we already know how to build good eco houses and we already have the technology to retrofit existing housing Despite this relatively few eco houses are being built Featuring over thirty case studies of eco housing in Britain Spain Thailand Argentina and the United States Eco Homes examines the ways in which

radical changes to our houses such as making them more temporary using natural materials or relying on manual heating and ventilation systems require changes in how we live As such it argues it is not lack of technology or political will that is holding us back from responding to climate change but deep rooted cultural and social understandings of our way of life and what we expect our houses to do for us
