Drying and Roasting of Cocoa and Coffee Ching Lik Hii,Flávio Meira Borém,2019-06-26 This is the first practical book dedicated to the fundamental and application aspects of two major unit operations in cocoa and coffee processing namely drying and roasting The drying and roasting of cocoa and coffee beans play critical roles in governing the formation

of flavor precursors in the early stages and also the development of flavor and aroma in the later stages during processing. Hence qualities of the finished chocolates and coffee powder products are affected greatly by the dried and roasted beans produced. Drying and Roasting of Cocoa and Coffee covers key topics areas ranging from post harvest processing equipment selection physical and chemical changes during processing flavor development grading and dried product quality. The book consists of two parts with topics dedicated to the drying roasting aspects of cocoa and coffee respectively. Features Provides a comprehensive review on flavor development during cocoa coffee processing. Discusses the impact of processing parameters on cocoa coffee quality. Presents the new trends in drying roasting techniques and novel technology. Examines the concept of coffee quality in light of both paradigms the traditional coffee and the specialty coffee grading systems. No prior knowledge of cocoa and coffee processing is required to benefit from this book which is written for a variety of readers. It is suitable for undergraduate and postgraduate students researchers and industrial practitioners consultants from various domains in the food and beverage industries.

Springer Handbook of Odor Andrea Büttner, 2017-02-28. The Springer Handbook of Odor is the definitive guide to all aspects related to the study of smell and their impact on human life. For the first time this handbook aligns the senso chemo analytical characterization of everyday smells encountered by mankind with the elucidation of perceptual hedonic behavioral and physiological responses of humans to such odors. From birth onwards we learn to interact with our environment using our sense of smell. Moreover evolutionary processes have engendered a multifaceted communication that is supported even dominated by olfaction. This compilation examines the responses of humans to odors at different stages of life thereby building a foundation for a widely overseen area of research with broader ramifications for human life. The expert international authors and editor align aspects concepts methodologies and perspectives from a broad range of different disciplines related to the science of smell. These include chemistry physiology psychology material sciences technology but also disciplines related to linguistics culture art and design. This handbook edited by an internationally renowned aroma scientist with the support of an outstanding team of over 60 authors is an authoritative reference for researchers in the field of odors both in academia and in industry and is also a useful reference for newcomers to the area.
