The Big Beasts of English Grammar: An Exploration of Form and Function in Conversations Christian Jones, Graham Burton, 2024-12-15 What do we really know about how the grammar topics that seem to dominate language teaching are used in conversation In this book the authors explore some of the big beasts of English grammar those familiar structures like conditionals and reported speech that are often emphasised in syllabuses and textbooks Drawing on a corpus of conversation data the book provides new insights into how these structures actually function in real life conversations revealing how grammar teaching often overlooks key contextual uses Aimed at teachers researchers and curriculum designers the book encourages readers to rethink grammar explanations and instruction It challenges long standing rules and assumptions also offering practical ideas on how to better incorporate grammar into lessons that focus on spoken English Covering important grammar areas such as modal verbs quantifiers and comparatives it s a valuable resource for those interested in how grammar operates in real world dialogue

Ideology and Hegemony of English Foreign Language Textbooks Ömer Gökhan Ulum, Dinçay Köksal, 2020-01-27 This volume investigates ideological and hegemonic practices in globally and locally written English as a Foreign Language EFL textbooks and explores whether these textbooks reflect the values beliefs and norms of the native speaker society by examining their ideological components and the hegemonic practices by means of which the source society or state seeks to influence learners of the language It also attempts to clarify EFL teachers and students views on the underlying ideology and hegemonic practices in globally and locally written EFL textbooks Studies on the relationship between ideology hegemony and textbooks in applied linguistics have become more prevalent in recent decades as the emergence of critical theory critical pedagogy and critical thinking skills from the 1920s onwards has led scholars to adopt a more critical perspective towards EFL textbooks especially with regard to elements of ideology and hegemony These two terms encompass a plethora of components ranging from nationalism to religion At the same time the importance of metanarratives originating from the tenets of modernism has declined from the 1960s onwards the assumption being that the world has entered a new age called postmodernism and post structuralism that emphasizes the role of individuals and rejects efforts to reinforce post colonialism the effects of which can be seen in EFL textbooks Accordingly taking the elements of ideology and hegemony into account remains a vital aspect in the analysis of EFL textbooks

Cognitive Approaches to English Mario Brdar, Marija Omazić, Višnja Pavičić Takač, 2009-12-14 The present volume contains a selection of papers presented at the conference Cognitive Approaches to English an international event organized to mark the 30th anniversary of English studies at the Faculty of Philosophy Josip Juraj Strossmayer University Osijek which

was held in Osijek on October 18 19 2007 The participants were invited to discuss issues in cognitive accounts of English ranging from fundamental to methodological to interdisciplinary and applied The volume is accordingly divided into four parts Part I Motivation in grammar deals with various phenomena in the grammar of English in the broadest sense of the term all of which are shown to be motivated by metaphorical and or metonymic operations Part II Constructing meaning between grammar and lexicon contains five chapters dealing with phenomena ranging from various peculiarities of form meaning pairings such as synonymy polysemy and figurative meanings to concept formation The four chapters that make up Part III are concerned with the phenomenon of interlinguistic and intercultural variation in the use of metaphorical and metonymic processes The volume is concluded by Part IV the three papers of which attempt to reconsider some TEFL issues from a cognitive linguistic point of view

Neoliberalism and Applied Linguistics David Block, John Gray, Marnie Holborow, 2013-03-01 This book explores neoliberalism a view of the world that puts the market at its centre from the perspective of applied linguistics Neoliberalism and Applied Linguistics argues that while applied linguistics has become more interdisciplinary in orientation it has ignored or downplayed the role of political economy namely the way in which social political and economic factors relate to one another within the context of a capitalist economy The authors take the view that engagement with political economy is central to any fully rounded analysis of language and language related issues in the world today and their collaboration in this volume represents an initial attempt to redress what they perceive to be an imbalance in the field The book begins with a discussion of neoliberalism and an analysis of the ways in which neoliberal ideology impacts on language This is followed by a discussion of how globalization and identity have been conceptualised in applied linguistics in ways which have ignored the political centrality of class a concept which the authors see as integral to their perspective The book concludes with an analysis of the ways in which neoliberal ideology plays out in two key areas of applied linguistics language teaching and language teacher education Neoliberalism and Applied Linguistics is essential reading for advanced undergraduates postgraduates and researchers in applied linguistics
