Immigration and Children's Literature Wilma

Robles-Melendez, Audrey Henry, 2023-06-29 This book explores the issues faced by immigrant children through the lens of children's literature. The authors employ the UN convention of the Rights of the Child, the lens of equity and Freire's principles of critical consciousness as a framework for analysing children's literature and immigration. They focus on circumstances and experiences of immigration from the perspective of young children who are leaving their homelands and growing up as immigrants. The book focuses primarily on children from birth to 8 years old but with crossover and implications for older children. The chapters reveal the social, economic and political issues faced by child immigrants, refugees and asylees throughout the global context, viewed through and alongside children's literature. The book provides suggestions for the implementation of children's literature in the curriculum and provides tools for educators and researchers working with immigrant and refugee children, showing how they can better understand their students and families. A variety of children's literature is covered, including analysis of works by Jairo Buitrago, Yanksook Choi, Sandra LeGuen, Rosemary McCartney, Bao Phi and Jeanette Winter.

Creating Marketing Magic and Innovative Future Marketing Trends Maximilian Stieler, 2017-01-06 This volume includes the full proceedings from the 2016 Academy of Marketing Science (AMS) Annual Conference held in Orlando, Florida, entitled *Creating Marketing Magic and Innovative Future Marketing Trends*. The marketing environment continues to be dynamic. As a result, researchers need to adapt to the ever-changing scene. Several macro-level factors continue to play influential roles in changing consumer lifestyles and business practices. Key factors among these include the increasing use of technology and automation, juxtaposed by nostalgia and back to the roots marketing trends. At the same time, though, as marketing scholars, we are able to access emerging technology with greater ease to undertake more rigorous research practices. The papers presented in this volume aim to address these issues by providing the most current research from various areas of marketing research, such as consumer behavior, marketing strategy, marketing theory, services marketing, advertising, branding, and many more. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses, and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights complementing the Academy's flagship journals, the *Journal of the Academy of Marketing Science* (JAMS) and *AMS Review*. Volumes are edited by leading scholars and practitioners across a wide range of subject areas in marketing science.

The Myths About Nutrition Science David Lightsey, 2019-11-14 Many nutrition science and food production myths and misconceptions dominate the health and fitness field, and many athletes and active consumers unknowingly embrace a myriad of what can be deemed junk science, which has now infiltrated many related science fields. Consumers simply have no reliable source to help them

navigate through all the hype and fabrication leaving them vulnerable to exploitation The aim of *The Myths About Nutrition Science* is then to address the quagmire of misinformation which is so pervasive in this area This will enable the reader to make more objective science based lifestyle choices as well as physical training or developmental decisions The book also enables the reader to develop the necessary critical thinking skills to better evaluate the reliability of the purported science as reported in the media and health related magazines or publications *The Myths About Nutrition Science* provides an authoritative yet readily understandable overview of the common misunderstandings that are commonplace within consumer and athlete communities regarding the food production process and nutrition science which may affect their physical development performance and long term health

Nutrition for the Older Adult Melissa Bernstein,Ann Luggen,2010

Nutrition for the Older Adult is a clear comprehensive text that introduces students to nutrition and health promotion for older adults Covering such important topics as the physiological changes of aging weight and nutrition problems in older adults nutritional assessment and support for the elderly and diet and cultural diversity as well as exercise prescriptions for older adults this text is an essential resource for students in the fields of nutrition nursing and gerontology

Clinical Nutrition of the Essential Trace Elements and Minerals John D. Bogden,Leslie M. Klevay,2000-07-26 The Nutrition and Health series of books have as an overriding mission to provide health professionals with texts that are considered essential because each includes 1 a synthesis of the state of the science 2 timely in depth reviews by the leading researchers in their respective fields 3 extensive up to date fully annotated reference lists 4 a detailed index 5 relevant tables and figures 6 identification of paradigm shifts and the consequences 7 virtually no overlap of information between chapters but targeted inter chapter referrals 8 suggestions of areas for future research and 9 balanced data driven answers to patient questions which are based upon the totality of evidence rather than the findings of any single study The series volumes are not the outcome of a symposium Rather each editor has the potential to examine a chosen area with a broad perspective both in subject matter as well as in the choice of chapter authors The international perspective especially with regard to public health initiatives is emphasized where appropriate The editors whose trainings are both research and practice oriented have the opportunity to develop a primary objective for their book define the scope and focus and then invite the leading authorities from around the world to be part of their initiative The authors are encouraged to provide an overview of the field discuss their own research and relate the research findings to potential human health consequences
