

CASE STUDY: Labor & Delivery Fetal Monitoring

Scenario

You are the charge nurse working in labor and delivery at a local hospital. D.H. arrives, reporting contractions and feeling somewhat uncomfortable. You take her to the triage room to provide privacy, have her change into a gown and begin your assessment to determine your next course of action.

1. What 4 initial questions will you ask, and why?

1. **When is your Due date?** If the baby is close to due date it is safe to deliver the baby. However, if the baby is very premature its important to learn what's causing the premature contractions and uncover any underlying problems. You may also ask if the patient has felt the baby move or if there has been any bleeding or injuries.
2. **Has your water broken?** Contractions become stronger and more uncomfortable after her water breaks.
3. **Is this your first pregnancy?** Typically labor during a first pregnancy is more prolonged and the woman has limited knowledge on what to expect.
4. **Can you describe your contractions?** By asking how far apart they are, the duration and pain's location, you can determine if they are true or false contractions. Cramps and abdomen pain are associated with false contractions, while back and fundal pain is associated with true contractions.
