Humanism in Surgery Fabrice Jotterand,Clara Bosco,2025-04-21 This book offers an examination of the importance of
humanism in surgical education and practice As technology is increasingly dictating the way of being and doing in medicine
there is an urgent need to re consider what medical humanism can offer to sustain the professional identity of surgeons and
contribute to the training of future surgeons Bioethics usually considered as major source for the professional identity of
surgeons is ill suited for such a task as it has produced a process of moral reasoning that is less interested in questions of
personal and professional identity and more devoted to principles of obligation concerning right actions and pragmatic
considerations that optimize outcomes Fostering Humanism in Surgical Practice provides an intellectually robust medical
ethics beyond bioethics and a vision of medicine qua surgery medical professionalism and medical humanism re oriented
toward the promotion of character development compassionate care and human flourishing for both patients and surgeons
This volume will be targeted at a wide scholarly audience including researchers from medicine philosophy of medicine the
humanities philosophy of technology medical anthropology information robotics medical engineering law and others This text
