Accelerating Digital Transformation with the Cloud and the Internet of Things (IoT) Yacine Atif,Sujith Samuel Mathew,2025-01-20 Accelerating Digital Transformation with the Cloud and the Internet of Things IoT is a reference for IT engineers and decision makers who may engage in IoT platform pilot projects The resources covered in this book help establish plans for sustainable operations and management and assist with the long term procurement of relevant IoT technologies The aim of the book is to be exhaustive and holistic by pointing out numerous issues and related solution options that guide with daily challenges when deploying and running IoT platforms The book is divided into three parts where each part includes relevant theoretical chapters and applied case studies Part One focuses on architectural and federation options for the design and implementation of IoT platforms that foster strategic collaboration opportunities Part Two addresses vertical security challenges across IoT platform layers Finally

Part Three shows how IoT is driving the digital transformation wheel through existing and forthcoming case studies Explores how IoT is driving the digital transformation wheel through existing and forthcoming case studies Investigates architectural and federation options for the design and implementation of IoT platforms that foster strategic collaboration opportunities Features supplemental data repository with IoT collected case studies as well as related analytics scripts in Python The Practitioner's Guide to Antitrust in China Becky Nao Koblitz,2015-08-27 Management and legal counsel of foreign companies operating in China as well as those outside China with Chinese business desperately need to keep up with the fast paced antitrust developments in the most dynamic market in the world The author of this book Becky Koblitz is a seasoned antitrust lawyer for a major U S law firm in Beijing She has decades of legal experience as a prosecutor at the Antitrust Division of the U S Department of Justice as well as in house counsel for a German subsidiary of a major American real estate development company and as a lawyer at law firms globally Her rich experience in the U S Europe and China now often regarded as the three centers of global antitrust makes her the perfect candidate to write a book on China s antitrust development Her book is a quick read that tells what there is to know about China s antitrust enforcement and includes practical advice and examples for the various aspects of antitrust dealing with competitors dealing within the supply chain mergers etc She writes in a straight forward language such that non antitrust lawyers can get beyond stock phrases like illicit price coordination abuse of dominance or unilateral effect Her book is a valuable and practical cookbook for antitrust compliance training and beyond Another feature of the book is that it provides both legal and economic perspectives on antitrust analysis in China which is important given that economic analysis is increasingly adopted by China s antitrust agencies and the Chinese courts Thus understanding the logic and methodology behind economic analysis as applied to Chinese cases is key to conducting proper antitrust legal analysis that is tailored to the Chinese context To write a book on the burgeoning antitrust enforcement and practice for the constantly evolving Chinese market is a real challenge The trick and it is not as easy as you would think is to write simple declarative sentences understandable to the antitrust layman and at the same time not lose the rigor of antitrust analysis I think this relatively short book is a remarkable achievement in meeting such a challenge but I invite you to judge for yourself *Guide on digital agricultural extension and advisory services* Food and Agriculture Organization of the United Nations,2023-03-30 Digital agricultural extension and advisory services AEAS have a great potential to enhance accessibility delivery transparency scope and impacts of information and services for smallholder farmers However this potential is often unfully harnessed and the benefits of digital AEAS unequally distributed due to an evident widening digital divide between rural and urban areas gender and different social groups both within and among regions Due to low level e literacy and digital skills particularly smallholder farmers in rural areas in developing countries have limited access to and utilization of digital AEAS Considering the above mentioned benefits of digital AEAS their poor uptake by smallholder farmers and the importance of digital empowerment of smallholder farmers in particular this guide

targeting smallholder farmers in need of digital AEAS as its principal users provides a set of tools to enhance their digital skills in terms of basic knowledge and skills on using digital tools methods of access to digital AEAS methods of access to e-commerce and capacity building
