A Grand Delusion Eberhard Kienle, 2001-04-12 The author argues in this text that the much vaunted reform and liberalisation of Egypt's economy has been partial and selective far from beneficial to all Egyptians While the encouragement of the private sector has indeed benefited some it has failed to improve the standard of living of others in particular the lower middle classes and a large part of the landless rural population Most importantly economic reform and liberalisation have failed to produce a greater degree of political democracy notions of political accountability clean elections a genuinely free press the containment of police powers have turned out to be a great delusion which masks restrictions on political participation and civil liberties

**The End of the Developmental State?** Michelle Williams, 2014-01-10 The End of the Developmental State brings together leading scholars of development to assess the current status of the developmental state in several developing and transitional economies of South Korea Taiwan Ireland the United Kingdom China South Africa Brazil and India Has the concept of the developmental state become outmoded These authors would suggest not However they do argue that the historical trajectories of developmental states in Asia Latin

America Africa and Europe suggest all too clearly that the concept must be re-examined critically and creatively. The range and diversity of their positions and their rejection of stale programmatic positions from the past will revitalize the debate on the role of the state in social and economic transformation in the twenty-first century. By bringing together careful comparative analyses of national cases in both the Global North and South, the volume highlights pivotal conditions: economic restructuring, domestic politics, epistemic shifts, and ecological limits that are forcing revision of the goals and strategies of developmental states and suggests that states that ignore these new conditions will indeed see the end of the developmental state.

China, Europe and International Security Frans-Paul van der Putten, Chu Shulong, 2012-02-20. This book examines the roles played by China and Europe in the domain of international security in the 21st century. Bringing together Chinese and European expertise on the Sino-European security relationship, this book positions Europe, both the EU and the major national actors, and China in a global security context. It offers not merely an elaboration of the theme of bilateral security relations but also introduces a wider view on Europe and China as global security actors. The chapters cover four main themes: the perceptions of and actual relations between Europe and China as security actors; relations of China and Europe with third parties such as the US, Russia, and Iran; Europe and China as actors in multilateral security approaches; Europe and China as potential security actors in each other's technological domain or region. Given the increasingly prominent roles that both China and Europe play in international security as permanent members of the UN Security Council, in the European case through the informal and partial representation of the UK and France through their extensive global economic interests and their important relations with the USA, this book provides a timely examination of the current state and future developments in the Sino-European relationship. This book will be of much interest to students of international security, Chinese politics, EU studies, and IR in general.

*Rethinking Economic Development in Northeast India* Deepak K. Mishra, Vandana Upadhyay, 2017-02-03. The Madness of Women Jane Professor Ussher, Jane M. Ussher, 2011-03-28. Nominated for the 2012 Distinguished Publication Award of the Association for Women in Psychology. Why are women more likely to be positioned or diagnosed as mad than men? If madness is a social construction, a gendered label, as many feminist critics would argue, how

can we understand and explain women's prolonged misery and distress. In turn, can we prevent or treat women's distress in a non-pathologising, women-centred way? *The Madness of Women* addresses these questions through a rigorous exploration of the myths and realities of women's madness. Drawing on academic and clinical experience, including case studies and in-depth interviews, as well as on the now extensive critical literature in the field of mental health, Jane Ussher presents a critical multifactorial analysis of women's madness that both addresses the notion that madness is a myth and yet acknowledges the reality and multiple causes of women's distress. Topics include: The genealogy of women's madness; incarceration of difficult or deviant women; Regulation through treatment; Deconstructing depression, PMS and borderline personality disorder; Madness as a reasonable response to objectification and sexual violence; Women's narratives of resistance. This book will be of great interest to students and scholars of psychology, gender studies, sociology, women's studies, cultural studies, counselling and nursing. **Property for People, Not for Profit** Ulrich Duchrow, Franz J.

Hinkelammert, 2008-02-29 The issue of private property and the rights it confers remain almost undiscussed in critiques of globalization and free market economics. Yet property lies at the heart of an economic system geared to profit maximization. The authors describe the historically specific and self-consciously explicit manner in which it emerged. They trace this history from earliest historical times and show how, in the hands of Thomas Hobbes and John Locke, in particular, the notion of private property took on its absolutist nature and most extreme form, a form which neoliberal economics is now imposing on humanity worldwide through the pressures of globalization. They argue that avoiding the destruction of people's ways of living and of Nature requires reshaping our notions of private property. They look at practical ways for social and ecumenical movements to press for alternatives. *The Ecology of War and Peace* Eliana Cusato, 2021-09-16 The connection between ecology and conflict has been the object of extensive study by political scientists and economists. From the contribution of natural resource scarcity to violent unrest and armed conflict, to resource abundance as an incentive for initiating and prolonging armed struggles, to dysfunctional resource management and environmental degradation as obstacles to peacebuilding, this literature has exerted a huge influence upon academic discussions and policy developments. While international law is often invoked as the solution to the socio-environmental challenges faced by conflict-affected countries, its relationship with the ecology of war and peace remains undertheorised. Drawing upon environmental justice perspectives and other theoretical traditions, the book unpacks and problematizes some of the assumptions that underlie the legal field. Through an analysis of the practice of international courts, the UN Security Council and Truth Commissions, it shows how international law silences and even normalizes forms of structural and slow environmental violence. **The**

**Environment-Conflict Nexus in International Law** Eliana Cusato, 2021-09-16 Unpacks key assumptions about the environment, its relationship with violent conflict, and the justification for its protection underlying international law.
