Third Edition Mary Kinkel, Robert Sullivan, 2021-11-01 Digestion is the process of taking food and nutrients into the body and making them available for use in all of the body's processes. The digestive system breaks down food and extracts the important nutrients, eliminating the excess substances that cannot be used. These nutrients provide energy for the body to grow, function, and make repairs to itself. Digestion and Nutrition Third Edition describes the path that food takes through the system, the organs involved, and how the body uses different types of nutrients while highlighting the importance of healthy eating and the problems and diseases that can affect the digestive tract. Packed with full-color photographs and illustrations, this absorbing book provides students with sufficient background information through references, websites, and a bibliography.

The Digestive System Alvin Silverstein, Virginia B. Silverstein, 1970 Briefly discusses the various ways plants and animals obtain and utilize food, describes the human digestive system, and what happens to a roast beef sandwich when it is eaten, and explains the principles of nutrition.
