

# A Digital Method for the Discrimination of Neutrons and $\gamma$ Rays With Organic Scintillation Detectors Using Frequency Gradient Analysis

Charles C. Lee, Michael D. Jones, Xiaoting Ma, and Richard D. Applegate

**Abstract**—A digital method for the discrimination of neutrons and  $\gamma$  rays using organic scintillation detectors is described by using frequency gradient analysis (FGA) based on the Fourier transform. Since the discrimination process and the photomultiplier tube (PMT) signals used are often very noisy, some pulse-shape discrimination methods are investigated in this system (e.g., the charge comparison (CC) method or pulse gradient analysis (PGA) using two channels). Features of the signal gradient spectra are the presence of the leading structure, the AC content, the performance of the new FGA method and the FGA method have been studied and compared with theoretical results and then verified by Monte Carlo (MC) and computer simulations. Features extracted by the FGA method related to rising time, rise to the maximum, or other features of the photomultiplier tube (PMT) and can be used for discrimination between and  $\gamma$  rays using a digital multichannel AC method. It is shown that the FGA method results in an increase of about 10% in the discrimination between  $\gamma$  rays using the FGA method has the potential to be implemented in current multichannel systems to provide real-time discrimination for detection instruments.

**Index Terms**—Digital discrimination, frequency gradient analysis, neutron, organic scintillation, pulse gradient analysis, rise of signal.

## I. INTRODUCTION

ORGANIC scintillation detectors have often been used for the detection and spectroscopy of  $\gamma$ -rays, measurement of neutrons. One of the most important of liquid organic scintillators, the compound with some contents of two compressed groups—low fast and slow components of the scintillation. Because the structure of light that appears in the slow component often depends on the nature of the exciting particle, one can use this dependence to differentiate different kinds of radiation. Fluorescence response scintillators including different and compounds of organic and liquid scintillators, are particularly good examples of this phenomenon that is explained via pulse shape discrimination (PSD). This is because of the large difference in the slow component followed by different scintillators in these media. When organic scintillators are used in neutron detectors, PSD is an essential requirement because all neutron fields contain both

an unwanted  $\gamma$ -ray component arising as a result of scattering reactions of the neutrons with materials in the environment, and no direct discrimination of the primary reaction producing the neutron field [1].

A number of techniques for PSD have been investigated with varying degrees of success. The most popular of these are the charge comparison method [2] and the zero-crossing method [3]. Both of these methods were originally implemented in analog electronics, often in dedicated instrumentation modules or service instrument modules (SIMs). More recently, both of these methods have been been implemented in the digital domain as digital electronic systems have become available with their fast data speed and/or in order to make this possible. These methods have become the industrial standards for neutron systems with other new proposed discrimination methods, such as the correlation method [4] and the cosine fitting method [5].

In recent years, artificial neural networks (ANN) and fuzzy systems [6] have emerged as mature technologies, with several applications across many fields. They are particularly effective in pattern recognition tasks, and in this sense, ANN and FS can be used to classify neutrons and  $\gamma$ -ray events from the measurements performed by organic liquid scintillation detectors. In particular, Li et al. [7] used a fuzzy logic expert system (FLES) neural network to process the shape of light pulses in an organic liquid scintillation while D'Astous [8] proposed an approach based on fuzzy logic for pulse-shape discrimination in a single-layer scintillation detector.

In order to take advantage of capabilities offered by fast digital electronics, Bortolotto et al. [9] presented a discrimination algorithm that is computationally simple, referred to as pulse gradient analysis (PGA). This technique provides real-time digital characterization of measurements where neutrons and  $\gamma$ -ray events. The performance of the PGA method has been compared against a digital implementation of the conventional charge comparison method which demonstrated the PGA method provides an improvement in discrimination ability. Very recently, a dedicated portable neutron detector has been developed that provides real-time discrimination of mixed fields that is based on the PGA algorithm deployed on Kilobit Space 97 field-programmable gate array [10].

One of the many pulse-shape discrimination methods are two-channel features of the signal, e.g., the implementation of charge comparison method generally refers to the integration of the pulse over two different intervals and that of PGA method is based on the comparison of the relative heights of samples at the leading edge of the pulse. Since the scintillation process

## **Ieee Paper On Image Steganography:**

**Digital Watermarking** Mauro Barni, 2005-08-30 This book constitutes the refereed proceedings of the 4th International Workshop on Digital Watermarking Secure Data Management IWDW 2005 held in Siena Italy in September 2005 The 31 revised full papers presented were carefully reviewed and selected from 74 submissions The papers are organized in topical sections on steganography and steganalysis fingerprinting watermarking attacks watermarking security watermarking of unconventional media channel coding and watermarking theory and applications Digital Forensics and Watermarking Hongxia Wang, Xianfeng Zhao, Yunqing Shi, Hyoung Joong Kim, Alessandro Piva, 2020-03-25 The 22 full papers and 12 short papers presented in this volume were carefully reviewed and selected from 70 submissions The contributions are covering the following topics deep learning for multimedia security digital forensics and anti forensics digital watermarking information hiding steganography and steganalysis authentication and security Advances in Artificial Intelligence and Security Xingming Sun, Xiaorui Zhang, Zhihua Xia, Elisa Bertino, 2021-06-29 The 3 volume set CCIS 1422 CCIS 1423 and CCIS 1424 constitutes the refereed proceedings of the 7th International Conference on Artificial Intelligence and Security ICAIS 2021 which was held in Dublin Ireland in July 2021 The total of 131 full papers and 52 short papers presented in this 3 volume proceedings was carefully reviewed and selected from 1013 submissions The papers were organized in topical sections as follows Part I artificial intelligence Part II artificial intelligence big data cloud computing and security Part III cloud computing and security encryption and cybersecurity information hiding IoT security **Computer Networks & Communications (NetCom)** Nabendu Chaki, Natarajan Meghanathan, Dhinakaran Nagamalai, 2013-02-26 Computer Networks Communications NetCom is the proceedings from the Fourth International Conference on Networks Communications This book covers theory methodology and applications of computer networks network protocols and wireless networks data communication technologies and network security The proceedings will feature peer reviewed papers that illustrate research results projects surveys and industrial experiences that describe significant advances in the diverse areas of computer networks communications *Advanced Intelligent Computing Technology and Applications* De-Shuang Huang, Wei Chen, Yijie Pan, 2024-08-01 This 13 volume set LNCS 14862 14874 constitutes in conjunction with the 6 volume set LNAI 14875 14880 and the two volume set LNBI 14881 14882 the refereed proceedings of the 20th International Conference on Intelligent Computing ICIC 2024 held in Tianjin China during August 5 8 2024 The total of 863 regular papers were carefully reviewed and selected from 2189 submissions This year the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications Therefore the theme for this conference was Advanced Intelligent Computing Technology and Applications Papers that focused on this theme were solicited addressing theories

methodologies and applications in science and technology      *Digital Forensics and Watermarking* Yun Qing Shi, Hyoung Joong Kim, Fernando Perez-Gonzalez, Feng Liu, 2017-02-14 This book constitutes the revised post conference proceedings of the 15th International Workshop on Digital Forensics and Watermarking IWDW 2016 held in Beijing China in September 2016 The 45 papers presented in this volume were carefully reviewed and selected from 70 submissions The contributions are organized in topical sections on digital forensics visual cryptography reversible data hiding and steganography and steganalysis      **High Performance Architecture and Grid Computing** Archana Mantri, Suman Nandi, Gaurav Kumar, Sandeep Kumar, 2011-07-05 This book constitutes the refereed proceedings of the International Conference on High Performance Architecture and Grid Computing HPAGC 2011 held in Chandigarh India in July 2011 The 87 revised full papers presented were carefully reviewed and selected from 240 submissions The papers are organized in topical sections on grid and cloud computing high performance architecture information management and network security      **Neural Information Processing** Mufti Mahmud, Maryam Dobarjeh, Kevin Wong, Andrew Chi Sing Leung, Zohreh Dobarjeh, M. Tanveer, 2025-07-21 The eleven volume set LNCS 15286 15296 constitutes the refereed proceedings of the 31st International Conference on Neural Information Processing ICONIP 2024 held in Auckland New Zealand in December 2024 The 318 regular papers presented in the proceedings set were carefully reviewed and selected from 1301 submissions They focus on four main areas namely theory and algorithms cognitive neurosciences human centered computing and applications

**Cloud Computing and Security** Xingming Sun, Zhaoqing Pan, Elisa Bertino, 2018-09-12 This six volume set LNCS 11063 11068 constitutes the thoroughly refereed conference proceedings of the 4th International Conference on Cloud Computing and Security ICCCS 2018 held in Haikou China in June 2018 The 386 full papers of these six volumes were carefully reviewed and selected from 1743 submissions The papers cover ideas and achievements in the theory and practice of all areas of inventive systems which includes control artificial intelligence automation systems computing systems electrical and informative systems The six volumes are arranged according to the subject areas as follows cloud computing cloud security encryption information hiding IoT security multimedia forensics      *Artificial Intelligence and Security* Xingming Sun, Xiaorui Zhang, Zhihua Xia, Elisa Bertino, 2022-07-04 This three volume set LNCS 13338 13340 constitutes the thoroughly refereed proceedings of the 8th International Conference on Artificial Intelligence and Security ICAIS 2022 which was held in Qinghai China in July 2022 The total of 166 papers included in the 3 volumes were carefully reviewed and selected from 1124 submissions The papers present research development and applications in the fields of artificial intelligence and information security      Digital Watermarking Hyoung Joong Kim, Stefan Katzenbeisser, Anthony T. S. Ho, 2009-09-29 This book constitutes the thoroughly refereed post conference proceedings of the 7th International Workshop on Digital Watermarking IWDW 2008 held in Busan Korea in November 2008 The 36 regular papers included in the volume were carefully reviewed and selected from 62 submissions Areas of interest to the conference are mathematical modeling of embedding and detection

information theoretic stochastic aspects of data hiding security issues including attacks and counter attacks combination of data hiding and cryptography optimum watermark detection and reliable recovery estimation of watermark capacity channel coding techniques for watermarking large scale experimental tests and benchmarking new statistical and perceptual models of content reversible data hiding data hiding in special media data hiding and authentication steganography and steganalysis data forensics copyright protection DRM and forensic watermarking and visual cryptography

*Digital Forensics and Watermarking* Xianfeng Zhao, Yun-Qing Shi, Alessandro Piva, Hyoung Joong Kim, 2021-02-11 This volume constitutes the proceedings of the 19th International Workshop on Digital Forensics and Watermarking IWDW 2020 held in Melbourne VIC Australia in November 2020 The 20 full papers in this volume were carefully reviewed and selected from 43 submissions They cover topics such as novel research development and application of digital watermarking and forensics techniques for multimedia security

Soft Computing: Theories and Applications Millie Pant, Tarun K. Sharma, Om Prakash Verma, Rajesh Singla, Afzal Sikander, 2020-02-24 The book focuses on soft computing and its applications to solve real world problems in different domains ranging from medicine and health care to supply chain management image processing and cryptanalysis It includes high quality papers presented at the International Conference on Soft Computing Theories and Applications SoCTA 2018 organized by Dr B R Ambedkar National Institute of Technology Jalandhar Punjab India Offering significant insights into soft computing for teachers and researchers alike the book inspires more researchers to work in the field of soft computing

Image and Graphics Technologies and Applications Wang Yongtian, Wu Lifang, 2023-10-24 This book constitutes the refereed proceedings of the 18th Chinese Conference on Image and Graphics Technologies and Applications IGTA 2023 held in Beijing China during August 17 19 2023 The 35 full papers included in this book were carefully reviewed and selected from 129 submissions They were organized in topical sections as follows image processing and enhancement techniques machine vision and 3D reconstruction image video big data analysis and understanding computer graphics visualization and visual analysis virtual reality and human computer interaction and applications of image and graphics

*Advanced Hybrid Information Processing* Shuai Liu, Gelan Yang, 2019-05-12 This book constitutes the refereed proceedings of the Second EAI International Conference on Advanced Hybrid Information Processing ADHIP 2018 held in Yiyang China in October 2018 The 71 papers presented were selected from 228 submissions and focus on hybrid big data processing Since information processing has acted as an important research domain in science and technology today it is the right time to develop deeper and wider use of hybrid information processing especially information processing for big data There are more remaining issues waiting for solving such as classification and systemization of big data objective tracking and behavior understanding in big multimedia data encoding and compression of big data

**System Innovation for a Global Economy** Artde Donald Kin-Tak Lam, Stephen D. Prior, Siu-Tsen Shen, Sheng-Joue Young, Liang-Wen Ji, 2025-10-10 System Innovation for a Global Economy contains the contribution to the 2025 International Conference on Applied System

Innovation ICASI 2025 Tokyo Japan April 22 25 2025 Of the more than 500 submitted papers from 14 different countries after review approximately a quarter was accepted for publication The book aims to provide an integrated communication platform for researchers from a wide range of topics including information technology communication science applied mathematics computer science advanced material science and engineering System Innovation for a Global Economy enhances interdisciplinary collaborations between science and engineering technologists and is aimed at academics and technologists interested in the above mentioned areas

**Frontiers in Cyber Security** Biwen Chen,Xinwen Fu,Min Huang,2024-12-26 This two volume set CCIS 2315 and CCIS 2316 constitutes the refereed proceedings of the 7th International Conference on Frontiers in Cyber Security FCS 2024 held in Chongqing China during July 26 28 2024 The 47 full papers presented in these two volumes were carefully reviewed and selected from 121 submissions The papers are organized in the following topical sections Part I Machine Learning and Differential Privacy Federated Learning Privacy Preserving Services Blockchain and Distributed System Public Key Cryptography Multi Party Computation Part II Multi Party Computation Smart Grid Authentication and Deduplication

*Multimedia Forensics and Security* Li, Chang-Tsun,2008-07-31 As information technology is rapidly progressing an enormous amount of media can be easily exchanged through Internet and other communication networks Increasing amounts of digital image video and music have created numerous information security issues and is now taken as one of the top research and development agendas for researchers organizations and governments worldwide Multimedia Forensics and Security provides an in depth treatment of advancements in the emerging field of multimedia forensics and security by tackling challenging issues such as digital watermarking for copyright protection digital fingerprinting for transaction tracking and digital camera source identification

**Mechanical Engineering, Materials and Energy II** Sally Gao,Tina Hu,2013-01-11 Selected peer reviewed papers from the 2nd International Conference on Mechanical Engineering Materials and Energy ICMEME 2012 October 26 27 2012 Dalian China

**Intelligent Cyber-Physical Systems Security for Industry 4.0** Jyoti Sekhar Banerjee,Siddhartha Bhattacharyya,Ahmed J Obaid,Wei-Chang Yeh,2022-12-16 Intelligent Cyber Physical Systems Security for Industry 4 0 Applications Challenges and Management presents new cyber physical security findings for Industry 4 0 using emerging technologies like artificial intelligence with machine deep learning data mining applied mathematics All these are the essential components for processing data recognizing patterns modeling new techniques and improving the advantages of data science Features Presents an integrated approach with Cyber Physical Systems CPS security and Industry 4 0 in one place Exposes the necessity of security initiatives standards security policies and procedures in the context of industry 4 0 Suggests solutions for enhancing the protection of 5G and the Internet of Things IoT security Promotes how optimization or intelligent techniques envisage the role of artificial intelligence machine deep learning AI ML DL in cyberphysical systems security for industry 4 0 This book is primarily aimed at graduates researchers and professionals working in the field of

security Executives concerned with security management knowledge dissemination information and policy development for data and network security in different educational government and non government organizations will also find this book useful

Yeah, reviewing a book **Ieee Paper On Image Steganography** could increase your near contacts listings. This is just one of the solutions for you to be successful. As understood, finishing does not recommend that you have astonishing points.

Comprehending as capably as understanding even more than further will manage to pay for each success. next to, the proclamation as capably as insight of this Ieee Paper On Image Steganography can be taken as skillfully as picked to act.

### Ieee Paper On Image Steganography Introduction

Ieee Paper On Image Steganography Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Ieee Paper On Image Steganography Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Ieee Paper On Image Steganography : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Ieee Paper On Image Steganography : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Ieee Paper On Image Steganography Offers a diverse range of free eBooks across various genres. Ieee Paper On Image Steganography Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Ieee Paper On Image Steganography Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Ieee Paper On Image Steganography, especially related to Ieee Paper On Image Steganography, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Ieee Paper On Image Steganography, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Ieee Paper On Image Steganography books or magazines might include. Look for these in online stores or libraries. Remember that while Ieee Paper On Image Steganography, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Ieee Paper On Image Steganography eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Ieee Paper On Image Steganography full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Ieee Paper On Image Steganography eBooks, including some popular titles.

## FAQs About Ieee Paper On Image Steganography Books

**What is a Ieee Paper On Image Steganography PDF?** A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Ieee Paper On Image Steganography PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Ieee Paper On Image Steganography PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Ieee Paper On Image Steganography PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Ieee Paper On Image Steganography PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
