Papadopoulou, Hugo Borges Sarmiento, Antonio Ardá Suárez, Claudio Alberto Casal, 2022-05-24      **Intellectual Property in Russia** Natalia M. Udalova, Anna S. Vlasova, 2021-07-28 Intellectual property rights are essential for a firm's competitive edge and success and form the significant assets for many firms The authors of this book argue that intellectual property is a complex phenomenon which inevitably requires a combination of both economic and legal considerations because the lack of understanding of the mechanisms for the protection and preservation of IP can serve to undermine any of the potential economic benefits The

book outlines the opportunities that can be derived from the use of IP in business and also identifies the rules necessary for their implementation. It offers a comprehensive systemic research of intellectual property based on the most up to date legislation and cases of IP use in Russia. Such an approach will allow readers to fully understand the peculiarities of IP as a special phenomenon of the Russian market. There is a good balance between theoretical knowledge and practical implementation and the plain language and unique approach to structuring information make the book accessible and easy to understand. It contains a special glossary of terms to facilitate the understanding of the material presented in the book. Although the book looks specifically at the Russian case it will have international appeal since intellectual property by its very nature has become a transnational phenomenon. Moreover the international regulatory framework provides for the similarity of legal regulation of IP. The book will find an audience among researchers concerned with the economics and law of intellectual property as well as policymakers and practitioners involved in business IP.

Proportionality and Facts in Constitutional Adjudication Anne Carter, 2022-01-27 This book considers the relationship between proportionality and facts in constitutional adjudication. Analysing where facts arise within each of the three stages of the structured proportionality test: suitability, necessity and balancing, it considers the nature of these facts vis-à-vis the facts that arise in the course of ordinary litigation. The book's central focus is on how proportionality has been applied by courts in practice and it draws on the comparative experience of four jurisdictions across a range of legal systems. The central case study of the book is Australia where the embryonic and contested nature of proportionality means it provides an illuminating study of how facts can inform the framing of constitutional tests. The rich proportionality jurisprudence from Germany, Canada and South Africa is used to contextualise the approach of the High Court of Australia and to identify future directions for proportionality in Australia at a time when the doctrine is in its formative stages. The book has three broad aims. First it considers the role of facts within proportionality reasoning. Second it offers procedural insights into fact finding in constitutional litigation. Third the book's analysis of the dynamic Australian case law on proportionality means it also serves to clarify the nature and status of proportionality in Australia at a critical moment. Since the 2015 decision of *McCloy v New South Wales* where four justices supported the introduction of a structured three part test of proportionality the Court has continued to disagree about the utility of such a test. These developments mean that this book with its doctrinal and comparative approach is particularly timely.
