How to read a food label

Daniele Bianchi, 2025-07-03 In the tone of a clear and

critical conversation Daniele Bianchi presents the most important information to guide the consumer to resist the gotchas explicit and implicit in the presentation of packaged foods The book is written about the European market but it is perfectly useful in showing how the food industry in general circumvents regulations to suit its interests without committing to the truth that should be in the labeling

Cellular Basis of Chemical Messengers in the Digestive System Morton Grossman,2012-12-02 Cellular Basis of Chemical Messengers in the Digestive System contains the proceedings of an international symposium on the cellular basis of chemical messengers of the digestive system held in Santa Monica California on January 16 17 and 18 1980 The papers explore the entire spectrum of problems related to the cellular aspects of chemical messengers in the digestive system with emphasis on which amines and peptides serve these functions and in which neurons and endocrine paracrine cells each kind of chemical messenger is found This book is comprised of 28 chapters divided into six sections and begins by considering the nature of gut peptides and their possible functions The discussion then turns to the diffuse neuroendocrine system and the phylogeny of the gastroenteropancreatic neuroendocrine system Methods such as immunocytochemistry electron immunohistochemistry and electron microscopy autoradiography are then described The following chapters focus on the function and morphology of endocrine paracrine cells immunochemical characterization of peptides in endocrine cells and nerves Langerhans islets as the neuro paraneuronal control center of the exocrine pancreas and regulation of metabolism by gastroenteropancreatic peptides The final section presents experimental results including in vitro studies of canine pseudo islets and of the mechanism of gastrin release This monograph will be of interest to physiologists and other practitioners in the field of medicine **Drinking Water Quality and Human Health** Patrick Levallois,Cristina Villanueva

Belmonte,2019-04-04 The quality of drinking water is paramount for public health Despite important improvements in the last decades access to safe drinking water is not universal The World Health Organization estimates that almost 10% of the population in the world do not have access to improved drinking water sources Among other diseases waterborne infections cause diarrhea which kills nearly one million people every year mostly children under 5 years of age On the other hand chemical pollution is a concern in high income countries and an increasing problem in low and middle income countries Exposure to chemicals in drinking water may lead to a range of chronic non communicable diseases e g cancer cardiovascular disease adverse reproductive outcomes and effects on children s health e g neurodevelopment among other health effects Although drinking water quality is regulated and monitored in many countries increasing knowledge leads to the need for reviewing standards and guidelines on a nearly permanent basis both for regulated and newly identified contaminants Drinking water standards are mostly based on animal toxicity data and more robust epidemiologic studies with accurate exposure assessment are needed The current risk assessment paradigm dealing mostly with one by one chemicals

dismisses the potential synergisms or interactions from exposures to mixtures of contaminants particularly at the low exposure range Thus evidence is needed on exposure and health effects of mixtures of contaminants in drinking water Finally water stress and water quality problems are expected to increase in the coming years due to climate change and increasing water demand by population growth and new evidence is needed to design appropriate adaptation policies This Special Issue of International Journal of Environmental Research and Public Health IJERPH focuses on the current state of knowledge on the links between drinking water quality and human health
