

Key settings for **SUNSETS**

It's hard to resist the colours at sunset, but watch your exposure to make the most of them. Exposing for the sky gives you the best colours, but the foreground will become very dark. Use an ND grad filter to balance the exposure.

Exposure mode	Manual
Focus mode	Manual
Shutter speed	1/30 sec or longer
Aperture	f/16
ISO	100 or lower
Lens	18-24mm
Drive mode	Single-shot
White balance	Daylight

TOP TIP If you don't have a neutral-density grad filter, shoot twice – once exposed for the sky and another for the land. Combine them in Photoshop.

6D Jerry Grenough, 2024-09-03 The Canon 6D is the smallest and lightest full frame DSLR in the world. The image quality is extraordinary and it can even take an exposure in brightly lit night street scenes. It is my go-to camera for landscape and architectural photography. It has the Canon 5D classic film look to its photographs. I know an individual who has used this camera in taking more than 1 million wedding photographs. It has a reputation as a brilliant camera and is widely used to produce high-end astrophotography. This camera is a game changer. If you are in the market for a DSLR, this book is a must read as it will introduce you to the amazing aspects of this world-renowned camera as well as introduce you to landscape photography, architectural photography, night photography and astronomical photography. Also of note, the Canon 6D uses a Baader filter which converts the Canon 6D into a full spectrum camera which allows light through all the frequencies of a standard DSLR but boasts additional sensitivities to the red end of the spectrum and 656 nm H Alpha wavelength. Therefore, this Canon EOS 6D is fantastic gear for low light capabilities and for those involved in night photography.
