Haines,2012-12-06 There are two reasons why we have a new edition every four or five years The first is that technology changes Chapter 10 on computer based con trols has had to be almost completely rewritten Fundamentals don t change but the tools available to us do change Evaluation and proper use of those tools makes it even more imperative that we understand fundamentals Many of our control problems stem from the use of new devices as a solution to problems that are in fact control design errors New gadgets for example Direct Digital Controls DDC will not solve basic problems and may even compound them None the less you will find an extensive discussion of DDC because I think it is the probable future in HVAC control But it must be applied with a good understanding of fundamentals The second reason is that I keep learning and need to pass on my new and improved understanding to my readers Thus you will find a number of small but important revisions a dissertation on control modes and a much more detailed discussion of how electronic control devices work There are a few places where I have corrected what I now perceive to be errors I apologize for these I have been much encouraged by the acceptance of this book in the past and I hope that this new edition will be helpful Thank you for your support      **List of Inspected Electrical Equipment** Underwriters' Laboratories,1943      **Tree Planters' Notes** ,1976 Some no include reports compiled from information furnished by State Foresters and others      Operator, Organizational, Direct Support, General Support, and Depot Maintenance Manual Including Repair Parts and Special Tools List ,1989      Operator, Organizational, Direct and General Support Maintenance Manual for Refrigeration Unit, Electric Motor Driven, 9,000 Btu, Model CH609-31, NSN 4110-01-014-4646 ,1991      **Planters' Notes** ,1975 Some no include reports compiled from information furnished by State Foresters and others
