There is a significant positive correlation between the number of years of education and the number of years of experience. The correlation coefficient is 0.65, which is significant at the 0.05 level. The regression equation is $\text{Experience} = 0.65 \times \text{Education} - 1.5$, where Experience is the number of years of experience and Education is the number of years of education. The coefficient of determination is 0.42, which means that 42% of the variation in experience can be explained by the variation in education.
