their relationships with their employees their customers gastronomic critics suppliers of food and even their financiers It will appeal to academics in the areas of economic and cultural sociology and those with an interest in small entrepreneurial firms and their work relations but also to all those who have an interest in fine dining restaurants and the chef patrons at the centre of them The book draws on a large number of interviews with renowned chefs diners and Michelin inspectors to provide an unprecedented insight into what goes on in Michelin starred restaurants what makes their chefs tick intrigues their critics and beguiles or annoys their customers Restaurants are viewed not simply as businesses but as cultural enterprises that shape our taste in food ambience and sociality *Creativity Without Law* Kate Darling, Aaron

Perzanowski, 2017-02-28 Behind the scenes of the many artists and innovators flourishing beyond the bounds of intellectual property laws Intellectual property law or IP law is based on certain assumptions about creative behavior The case for regulation assumes that creators have a fundamental legal right to prevent copying and without this right they will under invest in new work But this premise fails to fully capture the reality of creative production It ignores the range of powerful non economic motivations that compel creativity and it overlooks the capacity of creative industries for self governance and innovative social and market responses to appropriation This book reveals the on the ground practices of a range of creators and innovators In doing so it challenges intellectual property orthodoxy by showing that incentives for creative production often exist in the absence of or in disregard for formal legal protections Instead these communities rely on evolving social norms and market responses sensitive to their particular cultural competitive and technological circumstances to ensure creative incentives From tattoo artists to medical researchers Nigerian filmmakers to roller derby players the communities illustrated in this book demonstrate that creativity can thrive without legal incentives and perhaps more strikingly that some creative communities prefer and thrive in environments defined by self regulation rather than legal rules Beyond their value as descriptions of specific industries and communities the accounts collected here help to ground debates over IP policy in the empirical realities of the creative process Their parallels and divergences also highlight the value of rules that are sensitive to the unique mix of conditions and motivations of particular industries and communities rather than the monoculture of uniform regulation of the current IP system The Performance Complex David Stark, 2020-07-10

What's valuable Market competition provides one kind of answer Competitions offer another On one side competition is an ongoing and seemingly endless process of pricings on the other competitions are discrete and bounded in time and location with entry rules judges scores and prizes This book examines what happens when ever more activities in domains of everyday life are evaluated and experienced in terms of performance metrics Unlike organized competitions such systems are ceaseless and without formal entry Instead of producing resolutions their scorings create addictions To understand these developments this book explores discrete contests architectural competitions international music competitions and world press photo competitions shows how the continuous updating of rankings is both a device for navigating the social world and an engine of

anxiety and examines the production of such anxiety in settings ranging from the pedagogy of performance in business schools to struggling musicians coping with new performance metrics in online platforms In the performance society networks of observation in which all are performing and keeping score are entangled with a system of emotionally charged preoccupations with one's positioning within the rankings From the bedroom to the boardroom pharmaceutical companies and management consultants promise enhanced performance This assemblage of metrics networks and their attendant emotional pathologies is herein regarded as the performance complex
