**Influence of Antibiotics on the Host-Parasite Relationship II** Dieter Adam, Helmut Hahn, Wolfgang Opferkuch, 2012-12-06 The Second International Symposium on The Influence of Antibiotics on the Host Parasite Relationship was held in Munich F R G from March 28 to 30 1985 The topics of the meeting dealt with the aspects of changes in bacterial metabolism and structure which occur under the influence of antibiotics and with the effects of such changes on the antibacterial host resistance The influence on pathogenicity factors changes in the outer membrane of bacteria as well as the influence on the individual components of the defence system were analysed in detail In addition these studies showed that antibiotics proved to be an excellent tool for the examination of bacterial physiology so that 50 years after the introduction of antibiotics additional important knowledge can be gained about the effect of these substances on bacteria Considering the observations reported it appears justifiable to postulate that new antibiotics should be routinely tested with respect to their possible effects on antiinfectious resistance Of course a consensus will have to be found on which to base methods and criteria employed The symposium documented an increasing interest of microbiologists and clinicians for this field of research It would not have been possible to organize it without the substantial support of the Paul Ehrlich Society as well as of Squibb Von Heyden Pharma Inc Particular help concerning the organization has been given by Werner Kremer of Squibb Von Heyden Pharma **Linne & Ringsrud's Clinical Laboratory Science - E-Book** Mary Louise Turgeon, 2015-02-10
