Many experts in various fields from China and around the world gather together at the conference to review, exchange, summarize, and promote their achievements in the fields of industrial engineering and engineering management. For example, some experts pay special attention to the current state of the application of related techniques in China, as well as their future prospects such as green product design, quality control, and management supply chain and logistics management to address the need for, amongst other things, low carbon energy saving and emission reduction. They also offer opinions on the outlook for the development of related techniques. The proceedings offer impressive methods and concrete applications for experts from colleges and universities, research institutions, and enterprises who are engaged in theoretical research into industrial engineering and engineering management and its applications. As all the papers are of great value from both an academic and a practical point of view, they also provide research data for international scholars who are investigating Chinese style enterprises and engineering management.
