

My View Of The Future Of Cars

The topic I picked is future cars, like air and flying cars this car doesn't run off oil like the cars we have now and plus the oil is getting in the air it's unhealthy to breathe in you don't have to spend money on gas no more people now complain about the prices this car would help out millions of people in the world.

The first air cars will have air compressors built into them you would be able to take them home and plug them up they said if you plug them up at home they might take up to 2 hours to fill up and if you take them to the store to fill it would take 3 minutes.

Air cars are made to be lighter than the cars we have now they weight will be under 2,000 pounds that will make the air cars faster. They suppose to make these vehicles cheap like 17,800 so Americans can afford them and so they can get a lot of money for making them. Back then in the 1900s, they had some flying cars one of the flying cars were called the Curtiss auto plane the man that made the flying car his name was Glenn Curtis he made the flying car in 1917.

His aluminum Autoplane sported three wings that spanned 40 feet and 12.2 meters. The car's motor drove a four-bladed propeller at the rear of the car. The Autoplane never truly flew but it did manage a few short hops. Another flying car was made by a man named Robert Fulton the name of the flying car was called Airphibian it was made in 1946. Instead of making a car for flying, Fulton made a plane for the road. The wings and tail section of the plane could be removed for road travel, and the propeller could be stored inside the plane's main body of the plane.
