Introducing CAL Keith Hudson, 2013-11-11 It is often the case perhaps more often than not that new ideas arrive long before there is the means to clothe and deliver them We can think of Leonardo da Vinci's drawings of helicopters and submarines among many other examples Computer Assisted Learning CAL is an example of an idea which has had a particularly long gestation As I will illustrate early in the book the principles of CAL were really first discovered by Socrates As a formal method of teaching the Socratic method disappeared for over two millennia until the 1950s It was then revived in the form of Programmed Learning PL which resulted from the researches of B F Skinner at Harvard University Even then PL was premature In the 1950s and

60s methods were devised such as teaching machines and various sorts of PL text books and there was a mushrooming of PL publishing at that time For a complex of reason economic logistical and technical PL also largely disappeared from the mid 60s although it continued in a few specialized areas of teaching and industrial training However during the same period PL quietly transformed itself into CAL But the computerized form was not capable of mass dissemination until recently because personal microcomputers did not have sufficient internal memory sizes That situation has now changed very dramatically and 128K microcomputers are becoming cheap and widely available Cheap memory chips of 256K and 1024K cannot be far away either
