Science is unique among the disciplines since it is inherently hands on. However the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning Killham et al 2014 Wong et al 2018 PreK 12 teachers consistently report feeling underprepared or overwhelmed by online learning environments Molnar et al 2021 Seaman et al 2018. This is coupled with persistent challenges related to elementary teachers lack of confidence and low science teaching self efficacy. Brigido Borrachero Bermejo Gunning Duran Duran 2004. Ideal for undergraduate teacher candidates graduate students teacher educators classroom teachers parents and administrators this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research based foundation.

*Women and Physics* Laura McCullough, 2016-04-01. This book begins with an examination of the numbers of women in physics in English speaking countries moving on to examine factors that affect girls and their decision to continue in science right through to education and on into the problems that women in physics careers face. Looking at all of these topics with one eye on the progress that the field has made in the past few years and another on those things that we have yet to address the book surveys the most current research as it tries to identify strategies and topics that have significant impact on issues that women have in the field.

**Handbook of Research on Water Sciences and Society** Vaseashta, Ashok, Duca, Gheorghe, Travin, Sergey, 2022-03-11.
