Minerals Yearbook, 2008, V. 3, Area Reports, International, Europe and Central Eurasia U. s. Department of Interior, U. s. Geological Survey, Workers and Trade Unions for Climate Solidarity Paul Hampton, 2015-06-05 This book is a theoretically rich and empirically grounded account of UK trade union engagement with climate change over the last three decades It offers a rigorous critique of the mainstream neoliberal and ecological modernisation approaches extending the concepts of Marxist social and employment relations theory to the climate realm The book applies insights from employment relations to the political economy of climate change developing a model for understanding trade union behaviour over climate matters The strong interdisciplinary approach draws together lessons from both physical and social science providing an original empirical investigation into the climate politics of the UK trade union movement from high level officials down to workplace climate representatives from issues of climate jobs to workers climate action This book will be of great interest to students and researchers in environmental politics climate change and environmental sociology Labour Law and Industrial Relations in Recessionary Times Anthony Forsyth, 2014-01-14 This volume includes a number of papers written in English and published in the last fifteen years in which the Italian labour market faced many changes The book not only provides the international readership with a frame of reference in both conceptual and legal terms that helps to appreciate the Italian Labour Law currently in force but also represents a contribution to moving beyond the self referential nature of the Italian debate on the reform of labour laws As such the book supplies the reform process of the Italian labour market with an international and comparative dimension which in accordance with the programmatic approach of Marco Biagi will also feed the debate at the national level Foreign and Commonwealth Office Annual Report 2007-08 Great Britain: Parliament: House of Commons: Foreign Affairs Committee, 2009 This report is the Committee s annual review of how the FCO is managing its resources examining the departmental annual report for 2007 08 Cm 7398 ISBN 9780101739825 Chapters cover new strategic framework performance measurement global network essential services FCO Services personnel issues transparency and openness financial management public diplomacy and communication the British Council the BBC World Service The Committee is concerned that the FCO is facing serious financial pressures in this financial year due to the Treasury s withdrawal of its support for the Overseas Pricing Mechanism OPM which used to protect departments from the weakening of sterling There is a risk that the FCO may not be able to meet higher international subscriptions over the next two financial years causing its performance against Public Service Agreement targets to suffer The likely increase in the UN Regular Budget and other international subscriptions will push this figure even higher The FCO should have to shoulder the financial burden from within its already tight budget to pay for subscriptions which also benefit other Government departments The Committee recommends that additional nondiscretionary costs should properly be met by the Treasury Energy Options Impact on Regional Security Frano Barbir, Sergio Ulgiati, 2010-09-02 Energy appears to be a fundamental

driving force of economic and political strategies as well as planetary stability Energy related issues such as 1 the availability of new energy sources and viable technologies 2 the disparity in access to energy sources 3 the role of energy in our societies energy societal metabolism 4 the energy support to the life of our cities where about half of world population is going to live very soon and 5 the energy demand for food security all over the world are hot problems that humans will have to face within the framework of sustainability ecologically sound production and consumption patterns associated with socially acceptable life styles in terms of policies technological development and economic processes A coherent energy strategy is required addressing both energy supply and demand security of access development problems equity market dynamics by also taking into account the whole energy lifecycle including fuel production transmission and distribution energy conversion and the impact on energy equipment manufacturers and the end users of energy systems Issues of energy efficiency and rebound effect must also be taken into proper account In the short term the aim should be to achieve higher energy efficiencies and increased supply from local energy sources in particular renewable energy sources

Comparative Renewables Policy Elin Lerum Boasson, Merethe Dotterud Leiren, Jørgen Wettestad, 2020-10-29 Challenging one eyed technology focused accounts of renewables policy this book provides a ground breaking deep diving and genre crossing longitudinal study of policy development The book develops a multi field explanatory approach capturing inter relationships between actors often analyzed in isolation It provides empirically rich and systematically conducted comparative case studies on the political dynamics of the ongoing energy transition in six European countries While France Germany Poland and the United Kingdom opted for technology specific renewables support mixes Norway and Sweden embarked on technology neutral support mixes Differences between the two groups result from variations in domestic political and organizational fields but developments over time in the European environment also spurred variation These findings challenge more simplistic and static accounts of Europeanization This volume will be of key interest to scholars and students of energy transitions comparative climate politics policy theory Europeanization European integration and comparative European politics more broadly as well practitioners with an interest in renewable energy and climate transition The Open Access version of this book available at <https://www.taylorfrancis.com/books/e/9780429198144> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
