**Unchanging Recipe of Bread** Şükran Özcan, Yelda Özcan, 2017-03-14 Since the prehistoric times bread is probably the only food with its recipe coming to today's world through the ages including the way of producing flour Bread

has been known most probably with its basic recipe and since making bread needs only flour water salt and most of the time yeast in the most basic form Most probably a dough from coarsely stone ground grain mixed with water and cooked over heated stones or in hot ashes was the first and in all terms natural form of bread Bread is the most basic food of all humanbeing everywhere in the world in common with the same basic content through the ages mainly unchanged Since flour is the main ingredient of bread the structure of flour itself is also too important for the best healthy and natural bread Because flour grain mostly a wheat is not a single thing but a whole complex of varieties with its hull germ and endosperm With nothing removed from the wheat grain you will get the best flour rich with all nutritive values and the fewer the ingredients the better the bread So we can say that the best bread is your homemade and this book has been written for this purpose to encourage you to make your own bread with all sincerely shared recipes that the author witnessed and experienced through her life You have everything nature offered you in the best form for the best bread Water flour and salt
