

Activity 4.2.2 Calorimetry POGIL™

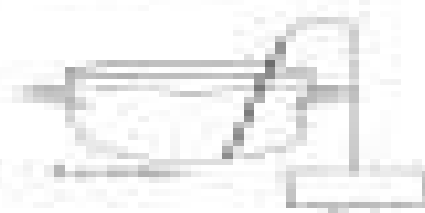

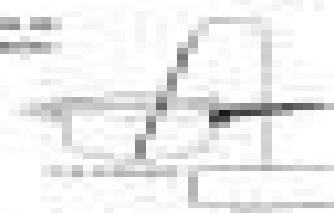

What is the relationship between heat energy and temperature?

Purpose: Students actively gain understanding of how mass, temperature, and heat energy, which is proportional to ΔT , are related.

Model 1 – A Hot oil Bath
(Silver Bulb)

After 10 minutes, 10 grams of water are added.

Consider the graphs, described in Model 1:

1. Suppose 10 grams of water and 10 grams of oil receive energy so that both gain the same amount of heat energy. Which graph is correct?

2. How does the addition of the hot oil affect the temperature as compared to the water alone? or compare the water alone to the oil alone? (Just describing)

1. Temperature increases more slowly for the water because it has a higher specific heat capacity.
