*Genetics 101* Michael Windelspecht, 2007-05-30 What should the average person know about science? Because science is so central to life in the 21st century, science educators and other leaders of the scientific community believe that it is essential that everyone understand the basic concepts of the most vital and far-reaching disciplines. *Genetics 101* does exactly that. This accessible volume provides readers, whether students new to the field or just interested members of the lay public, with the essential ideas of genetics using a minimum of jargon and mathematics. Concepts are introduced in a progressive order so that more complicated ideas build on simpler ones, and each is discussed in small bite-sized segments so that they can be more easily understood.

**Gardner and Sutherland's Chromosome Abnormalities and Genetic Counseling** R. J. McKinlay Gardner, David J. Amor, 2018 Even as classic cytogenetics has given way to molecular karyotyping and as new deletion and duplication syndromes are identified almost every day, the fundamental role of the genetics clinic remains mostly unchanged. Genetic counselors and medical geneticists explain the unexplainable, helping families understand why abnormalities occur and whether they're likely to occur again. *Chromosome Abnormalities and Genetic Counseling* is the genetics professional's definitive guide to navigating both chromosome disorders and the clinical questions of the families they impact. Combining a primer on these disorders with the most current approach to their best clinical approaches, this classic text is more than just a reference; it is a guide to how to think about these disorders even as our technical understanding of them continues to evolve. Completely updated and still infused with the warmth and voice that have made it essential reading for professionals across medical genetics, this edition of *Chromosome Abnormalities and Genetic Counseling* represents a leap forward in clinical understanding and communication. It is as ever essential reading for the field.
