Student Exploration: Human Evolution - Skull Analysis

Directions: Follow the instructions to go through the simulation. Respond to the questions and prompts in the orange boxes.

Vocabulary: bipedal, canine, cranial capacity, cranium, evolve, foramen magnum, hominid, hominin, index, maxilla, orbit, palate, skull

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. Label one of the **skulls** below as human and the other as a chimpanzee skull.

Human

Chimpanzee

2. What features did you use to identify which skull was human and which was chimpanzee?

The chimpanzee's skull is shaped differently and the jaw comes out more.

Gizmo Warm-up

In 1924, a fossilized skull that looked very similar to a chimp skull was discovered. But the skull most definitely did not belong to a chimp. The location of the **foramen magnum**—a hole in the skull where the spinal cord exits—indicated that the individual was **bipedal**, or walked on two legs. This fossil was some of the earliest evidence of human evolution.

Using the *Human Evolution – Skull Analysis* Gizmo, you will discover some of the ways that skulls can be used to learn about human evolution. Start by comparing two modern **hominids**: a human and a chimpanzee.

1. Examine the **Front view** of the *Homo sapiens* (modern human) skull. Then, use the **Select skull** menu to examine the same view of the *Pan troglodytes* (chimp) skull.

How do the skulls compare?

The human skull has a smaller jaw, smaller teeth, and larger forehead than the chimp. The chimp skull has a larger brow ridge and nose.

2. Now, examine the **Bottom view** of the two skulls. How do they compare?

The mouth of the chimp skulls is bigger. The foramen magnum on the human skull is closer to the front of the skull.

Radical-Local Teaching and Learning Seth Chaiklin, Mariane

Hedegaard, 2005-02-01 The cultural historical approach started in the 1930s by Lev Vygotsky who held that learning and instruction are the means to development is the foundation for the Radical Local Theory of Teaching and Learning formulated by Mariane Hedegaard and Seth Chaiklin in the first part of the book The central concern in this approach to education is how to integrate particular historical and cultural conditions that the children encounter into educational practices The second half of the book is an extensive case study of an after school programme for Puerto Rican primary students in East Harlem New York conducted in a radical local perspective This programme focussed on the history of the community and of Puerto Rican immigration and the study describes how it helped students become both more positive and more critical about their backgrounds By acquiring basic academic skills in a theoretical framework the children learn how to analyse their own local situation addressing not only immediate issues housing conditions family life community dynamics

but also historical issues Unlike apparently similar culturally responsive approaches to teaching underprivileged children radical local teaching explicitly uses subject matter teaching to encourage children s development in relation to their social conditions Hedegaard and Chaiklin detail how they developed concrete lesson plans in a radical local perspective and enumerate the accomplishments as well as the difficulties they encountered in implementing this approach *Using AI in Academic Writing and Research* Eldar Haber,Dariusz Jemielniak,Artur Kurasiński,Aleksandra Przegalińska,2025-05-24 This book comprehensively explores how AI tools can revolutionize academic writing research grant proposals and educational practices With a focus on practical applications ethical considerations and future trends the book serves as an indispensable roadmap for academics researchers and educators eager to integrate AI into their work Whether you re looking to enhance your research capabilities craft compelling grant proposals personalize learning experiences or lead your institution into the future this book provides the insights and tools necessary to navigate and shape the AI enhanced landscape of academia It demonstrates how to redefine scholarly work with cutting edge AI innovations through real life practical examples yet keeping the level of generalization high enough to keep it relevant for a few years By balancing specific actionable insights with broader perspectives this book equips readers to not only adapt to but actively influence the evolving role of AI in higher education research and funding acquisition ensuring its value as a resource both now and in the coming years Key Themes in Qualitative Research Paul Atkinson,Amanda Coffey,Sara Delamont,2004-01-01 Key Themes in Qualitative Research is an attempt by three well respected ethnographic researchers to present a balanced view of qualitative methodology and research The book is structured around classic texts written by methodological pioneers which comprise the basic foundation of modern qualitative research The authors examine key premises in these texts such as intimacy advocacy and validity and how they may be supported redesigned or made problematic in today s field This allows for a critical analysis of Old Guard vs Avant Garde ideas and provides for the reader a guide to wade through the proliferation of texts and theories available since the postmodern turn While not designed as a primer in qualitative research methods anyone with modest experience in the field should find this book extremely useful Technical Skills for Adventure Programming Mark Wagstaff,2009 This curriculum guide will improve your knowledge and technical instruction skills in land water and snow and ice sports and activities It will guide you in becoming a skilled adventure instructor in the classroom and in the field The CD ROM has printable lesson plans for each unit that make it easy to print only what you will need in the field book cover Caves and Karst Across Time Yongli Gao,E.
