testing POCT refers to pathology testing performed in a clinical setting at the time of patient consultation generating a rapid test result that enables informed and timely clinical action to be taken on patient care. It offers patients greater convenience and access to health services and helps to improve clinical outcomes. POCT also provides innovative solutions for the detection and management of chronic acute and infectious diseases in settings including family practices, Indigenous medical services, community health facilities, rural and remote areas and in developing countries where health care services are often geographically isolated from the nearest pathology laboratory. A Practical Guide to Global Point of Care Testing shows health professionals how to set up and manage POCT services under a quality assured, sustainable, clinically and culturally effective framework as well as understand the wide global scope and clinical applications of POCT. The book is divided into three major themes: the management of POCT services, a global perspective on the clinical use of POCT and POCT for specific clinical settings. Chapters within each theme are written by experts and explore wide-ranging topics such as selecting and evaluating devices, POCT for diabetes, coagulation disorders, HIV, malaria and Ebola, and the use of POCT for disaster management and in extreme environments. Figures are included throughout to illustrate the concepts, principles and practice of POCT. Written for a broad range of practicing health professionals from the fields of medical science, health science, nursing, medicine, paramedic science, Indigenous health, public health, pharmacy, aged care and sports medicine, A Practical Guide to Global Point of Care Testing will also benefit university students studying these health-related disciplines.

**The Technology Adoption and Gratification (TAG) Model and Its Application** A.Y.M. Atiquil Islam, 2024-11-18. The book introduces Technology Adoption and Gratification (TAG) Model and its application in higher education, technical and vocational education, postsecondary education and cross culture. The author demonstrates the fundamentals of technology adoption and gratification, what it comprises and how to expand it. The book describes how the viability of the TAG model was tested using Structural Equation Modeling for teaching, learning and research purposes, which could assist academicians and practitioners in performing technological measurements in all arenas of education. The book will attract researchers, students and practitioners who have backgrounds in educational technology, educational psychology, library information science, technical and vocational education or STEM education.
