food supplies have to be purchased well in advance of anticipated usage Large quantities of food are lost each year due to deterioration The problem is due to the perishable nature of food as well as to the rather lengthy Defense subsistence supply chain Due to these factors veterinary food inspection specialists are tasked with recognizing deterioration in subsistence and making recommendations to preclude public health problems and financial losses to the Government How do bacteria reproduce Does the bacterial cell contain a nucleus What are the shapes of bacteria If you cannot answer these questions now you should be able to when you have completed this course and you should also know the answers to many other questions For those of you who already know this material let it serve as a review Why are we interested in bacteria Because some bacteria are capable of waging war on the human race and some bacteria are capable of benefiting our lives We need to know the difference Bacteria are microorganisms and microorganisms are the smallest of all organisms for example 2 000 of them can be lined up across the head of a common pin In this subcourse we will be concerned with those tiny organisms that are unfriendly because they are responsible for a large percentage of spoilage in foods We believe it is important to know about those microorganisms that cause food deterioration so that we can eliminate deterioration in foods before it occurs

Psychological Issues in Eyewitness Identification Siegfried L. Sporer,Roy S. Malpass,Guenter Koehnken,2014-06-03 Why do police officers investigators prosecutors judges and others with an interest in eliciting accurate memory based testimony need to inform themselves of the research literature in experimental psychology that

addresses the question of witness memory The answer is straightforward from the perspective of a simple cost benefit analysis As with so many matters in the administration of public funds effectiveness holds important rewards Those who investigate crimes and decide which line of investigation to pursue and which line to postpone or set aside necessarily make judgments about the likely guilt of suspects based on the information at hand If they can make these judgments with a high degree of accuracy everyone benefits For many cases eyewitness identification is an important component of evidence prosecution and plea negotiation If witness identification is correctly implemented investigators and prosecutors can make their judgments effectively and focus their resources more efficiently A major component of effectiveness requires avoiding expending scarce resources on erroneous prosecutions It is in everyone's interest to make the best use of the memory of witnesses to preserve it without changing it to render it maximally accessible to provide an environment in which witnesses feel free to report their recollections and to accurately assess the probable validity of the witness's report regardless of the witness's certainty or doubts about its accuracy This volume gathers evidence from various research domains on eyewitness testimony Although many of the studies discussed deal with eyewitness identification it is noteworthy that many of them also touch upon other areas of concern to eyewitness researchers including chapters on voice recognition by humans and computers with particularly detailed instructions on conducting voice lineup differential aspects of recognition memory in children elderly eyewitness memory problems of cross racial identification psychological aspects of facial image reconstruction techniques person descriptions particular benefits of reinstating context as a means to improve eyewitness memory problems associated with various research paradigms in the eyewitness arena and recommendations on how to conduct lineups and photospreads and their proper evaluation Differentiated from other literature on this topic by its non technical language and accessibility to non professionals this volume covers a great deal of ground raises a host of questions settles some others and points the way to more effective use and evaluation of what eyewitnesses have to say
