**Malay Ideas on Development: From Feudal Lord to Capitalist** Shaharuddin Maaruf, 2022-12-06 Formally speaking the New Economy Policy had been replaced by the New Economic Order which had been promulgated in the name of liberalism Thus it may seem that the issues and concerns addressed by the book had been rendered irrelevant by the shift in policy Against such proposition I must say that my book addresses itself to the question of ideas principles and weltanschauung beyond mere policies and formality It is therefore too early in the day to conclude that the new liberalism has definitively replaced the New Economic Policy NEP as an era and ethos throwing into question the relevance of this book It may well turn out to be that the issues and concerns of the book transcend superficial policy changes in a more fundamental way Shaharuddin Maaruf University of Malaya 15 April 2014 The sweep through the history of Malay political ideas which is to be encountered in Malay Ideas on Development from Feudal Lord to Capitalist a sweep achieved with analytic skill and clarity will stimulate new readers to seek more detailed examination of one targeted writer or another Creating such desire is an indication of the book's effectiveness Juxtaposing one thinker with another setting modern debate in the context of traditional political thought proposing categories or streams of political thinking capitalistic nationalism traditionalistic nationalism and so forth is the best possible way of promoting a greater interest in the history of Malay political thinking and not just as an academic enterprise Shaharuddin Maaruf is one of a small handful of scholarly pioneers whose work has the capacity to enrich the quality of political debate in Malaysia Anthony Milner Basham Professor for Asian History Australian National University

**Ideas in the History of Economic Development** Estrella Trincado, Andrés Lazzarini, Denis Melnik, 2019-08-05 This edited volume examines the relationship between economic ideas economic policies and development institutions analysing the cases of 11 peripheral countries in Europe Latin America and Asia across the nineteenth and twentieth centuries It sheds light on the obstacles that have prevented the sustained economic growth of these countries and examines the origins of national and regional approaches to development The chapters present a fascinating insight into the ideas and visions in the different locations with the overarching categories of economic nationalism and economic liberalism and how they have influenced development outcomes This book will be valuable reading for advanced students and researchers of development economics the history of economic thought and economic history

*Ideas, Interests and the Development of the European Banking Systems* Florian Brugger, 2020-08-17 What are the grand dynamics that drive the history of economies The laws of supply demand most economists would argue For the history of European banking this book offers an alternative explanation Rather than market

forces the coincidence and coalitions of charismatic ideas and powerful interests is what shaped banking in Europe In Ideas Interests and the Development of the European Banking Systems Florian Brugger traced decisive moments in the history of the European Banking Sector from the time of the Italian City States to the post World War I period he shows how coalitions of ideas and interests built the tracks along which the European Banking Sector developed Inspired by Max Weber he argues that economic organizations and institutions like the Banking Sector are embedded into three fundamental orders the economic the cultural and the political order Enforced and institutionalized by vested interests ideas of the cultural order legitimate and empower interests of the economic and political order What is more decisive moments were frequently characterized by coalitions of ideas and interests between parties that in normal times had nothing in common or were even confronting each other in a hostile way

**How Ideas Shape Urban Political Development** Richardson Dilworth, Timothy P. R. Weaver, 2020-05-15 A collection of international case studies that demonstrate the importance of ideas to urban political development Ideas interests and institutions are the holy trinity of the study of politics Of the three ideas are arguably the hardest with which to grapple and despite a generally broad agreement concerning their fundamental importance the most often neglected Nowhere is this more evident than in the study of urban politics and urban political development The essays in How Ideas Shape Urban Political Development argue that ideas have been the real drivers behind urban political development and offer as evidence national and international examples some unique to specific cities regions and countries and some of global impact Within the United States contributors examine the idea of blight and how it became a powerful metaphor in city planning the identification of racially defined spaces especially black cities and city neighborhoods as specific targets of neoliberal disciplinary practices the paradox of members of Congress who were active supporters of civil rights legislation in the 1950s and 1960s but enjoyed the support of big city political machines that were hardly liberal when it came to questions of race in their home districts and the intersection of national education policy local school politics and the politics of immigration Essays compare the ways in which national urban policies have taken different shapes in countries similar to the United States namely Canada and the United Kingdom The volume also presents case studies of city based political development in Chile China India and Africa areas of the world that have experienced a more recent form of urbanization that feature deep and intimate ties and similarities to urban political development in the Global North but which have occurred on a broader scale Contributors Daniel B land Debjani Bhattacharyya Robert Henry Cox Richardson Dilworth Jason Hackworth Marcus Anthony Hunter William Hurst Sally Ford Lawton Thomas Ogorzalek Eleonora Pasotti Joel Rast Douglas S Reed Mara Sidney Lester K Spence Vanessa Watson Timothy P R Weaver Amy Widestrom

Currie,2014-01-31 A chapter from the Global Innovation Science Handbook a comprehensive guide to the science art tools and deployment of innovation brought together by two Editors of the prestigious International Journal of Innovation Science with ground breaking contributions from global innovation leaders in every type of industry International Development and the Social Sciences Frederick Cooper,Randall M. Packard,1997 This superb collection assembles a number of stimulating and theoretically current contributions by outstanding scholars Angelique Haugerud author of The Culture of Politics in Modern Kenya Culture and the Development of Children's Action Jaan Valsiner,1997-06-23 In this deeply probing intellectually challenging work Dr JaanValsiner lays the groundwork for a dynamic new cultural historicalapproach to developmental psychology He begins by deconstructingtraditional developmental theory exposing the conceptual confusionand epistemological blind spots that he believes continue to undermine the scientific validity of its methodologies Hedescribes the ways in which embedded cultural biases shapeinterventional goals and influence both the direction researchtakes and the ways in which research data are interpreted And hesuggests ways in which researchers and clinicians can become moreaware of and transcend those biases Dr Valsiner then develops a hierarchical systemic model thatportrays development as an open ended dialectical process Centralto Valsiner s approach is the premise that since each child isunique as are his or her life conditions deviations in functionor the rate of development from a prescribed norm are just aslikely to be constructive adaptations to changing environmentalpressures as symptoms of psychological disorder Drawing uponsources as varied as linguistic philosophy structuralanthropology thermodynamics and systems theory as well as thework of many of the leading figures in twentieth centurydevelopmental theory Valsiner argues convincingly for an approachto developmental psychology mature enough to recognize thedifference between healthy variability and dysfunction In later chapters the focus shifts from development in the abstractto the everyday challenges encountered by the developing child Case histories illustrate the subtle interplay of cultural physiological and psychological factors in shaping childhoodbehavior Called an intellectual tour de force by the Bulletin of theMenninger Clinic Culture and the Development of Children s Actionis important reading for developmental psychologists childpsychologists and all child clinicians Of course no science progresses in a linear fashion It movesinterdependently with the society in which it is embedded makinguse of the narrative forms in describing itself to its insiders andoutsiders The rhetoric of scientists about their science istherefore necessarily inconsistent Sciences are both socialinstitutions within a society and social organizations that attemptto build universal knowledge It is a complicated task forpsychology to be both knowledge constructing and self reflexive atthe same time Nevertheless it is the latter kind of reflexivitythat guides the actual construction of knowledge JaanValsiner This book is a fascinating and

important work that challenges much of contemporary developmental psychology The Second Edition has changed in a number of respects and much new material has been added but at root Valsiner grapples with the question how shall we understand development He continues to struggle also with what he describes rather vividly as the epistemological windmills of psychology His challenge is summed up succinctly in two lines from a poem by T S Eliot Where is the wisdom we have lost in knowledge Where is the knowledge we have lost in information from the Foreword by Kevin Connolly
