Universities, Sustainability and Society: Supporting the Implementation of the Sustainable Development Goals Walter Leal Filho, Amanda Lange Salvia, Luciana Brandli, Ulisses M. Azeiteiro, Rudi Pretorius, 2021-05-03 In order to yield the expected benefits sustainability initiatives need to be undertaken by means of a close cooperation between universities on the one hand and societal partners on the others The principle of co creation and co execution of sustainability initiatives increases the value for all by mutual learning and the sharing of expertise and resources But pursuing sustainability initiatives with a community and societal involvement is not simple There is a perceived need for a better understanding of how universities can interact with society in order to support the implementation of the UN Sustainable Development Goals This book is an attempt to address this need by a novel approach which focuses on current potentials and challenges across a wide range of fields and expertise The book focuses on how the theory and practice of sustainable development interact and shows the need for a continuation of the dialogue among sustainability academics and practitioners so as to address the issues matters and problems at hand The spectrum of themes addressed on this book also entails how environmental values and ethics are applied and the relationship between social biological and cultural diversity It also includes a broad disciplinary approach to sustainability including education research and case studies and the links with human environment relations in a sustainable development context **Amongst Mathematicians** Elena Nardi, 2008 This book offers a unique perspective on ways in which mathematicians perceive their students learning teach reflect on their teaching practice Elena Nardi achieves this by employing two fictional yet entirely data grounded characters to create a conversation on these important issues The construction of these characters is based on large bodies of data including intense focused group interviews with mathematicians and extensive analyses of students written work collected and analyzed over a substantial period Does Religious Education Work? James C. Conroy, David Lundie, Robert A. Davis, Vivienne Baumfield, L. Philip Barnes, Tony Gallagher, Kevin Lowden, Nicole Bourque, Karen J. Wenell, 2013-10-31 Society for Educational Studies Annual Book Prize winner 2nd Prize This ground breaking volume draws upon a rich and variegated range of methodologies to understand more fully the practices policies and resources available in and to religious education in British schools The descriptions explanations and analyses undertaken here draw on an innovative combination of policy work ethnography Delphi methods Actor Network Theory questionnaires textual analysis as well as theological and philosophical insight It traces the evolution of religious education in a post religious age from the creation of policy to the everyday experiences of teachers and students in the classroom It begins by analysing the way in which policy has evolved since the 1970s with an examination of the social forces that have shaped curriculum development It goes on to explore the impact and intentions of a diverse group of stakeholders with sometimes competing accounts of the purposes of religious educations It then examines the manner in which policy is or is not enacted in the classroom Finally it explores contradictions and confusions successes

and failures and the ways in which wider public debates enter the classroom The book also exposes the challenge religious education teachers have in using the language of religion *Enhancing Primary Mathematics Teaching* Thompson, Ian,2003-09-01 Click on the link below to access this title as an e book Please note that you may require an Athens account

Adolescent Romantic Relationships as Precursors of Healthy Adult Marriages Benjamin R. Karney,2007 Policymakers are interested in promoting healthy marriages in adulthood by providing services to strengthen the adolescent precursors of healthy marriage especially within low income populations But if programs and curricula targeting adolescent romantic relationships are to be effective they must be grounded in an accurate understanding of how adolescent relationships function and the role that they play in the development of healthy adult marriages This report evaluates the current landscape of theory research and interventions addressing the role of adolescent romantic relationships in the development of healthy adult marriages Drawing on a thorough review of the existing theoretical and empirical literature in this area as well as interviews with practitioners directly involved with developing or administering relationship education to adolescents the authors bring together relevant research and theory from a wide range of disciplines that have examined these issues and suggest future directions for research and intervention In particular they note that although research describing romantic relationships in low income populations is sparse there are already existing nationally representative data sets that include data from substantial numbers of well sampled low income adolescents Analyses of these data would have relatively low cost and a potentially high yield for informing policies that target low income youth *Primary ICT: Extending*

Knowledge in Practice John Duffty,2006-08-15 Still the biggest concern for many on initial teacher training courses is the acquisition of subject knowledge and the ability to translate that into effective teaching This book addresses this building on the core subject knowledge covered in the Achieving QTS series and relating it to classroom practice It supports trainees in extending and deepening their knowledge of ICT and demonstrating how to apply it to planning and implementing lessons Practical and up to date teaching examples are used to clearly contextualize subject knowledge A clear focus on classroom practice helps trainees to build confidence and develop their own teaching strategies *From Text to 'Lived' Resources* Ghislaine Gueudet,Birgit Pepin,Luc Trouche,2011-09-06 What kinds of curriculum materials do mathematics teachers select and use and how This question is complex in a period of deep evolutions of teaching resources with the proficiency of online resources in particular How do teachers learn from these materials and in which ways do they tailor them for their use and pupil learning Teachers collect resources select transform share implement and revise them Drawing from the French term *ing nerie documentaire* we call these processes documentation The literal English translation is to work with documents but the meaning it carries is richer Documentation refers to the complex and interactive ways that teachers work with resources in class and out of class individually but also collectively **We Reason & We Prove for ALL Mathematics** Fran
