edited collection is intended to provide input into the current review of the IB Diploma Programme. It comprises contributions from experienced authors, researchers and practitioners who were invited to reflect upon the nature of the core as it exists at present to raise issues in relation to the future development of the core and to share experience in the learning and teaching of the core components across a wide range of schools in both national and international systems of education. Questions concerning the concept of the core as a whole, developing students as internationally minded thinkers and the challenges of bringing coherence to the core in establishing a holistic approach to the curriculum underpin the individual chapters throughout.
